INSTRUCTIONS FOR USE

1. Child should be barefoot when foot is measured.

2. Place one foot on the chart, heel aligned with the bottom of the paper.

3. The size the edge of their toes is in is the appropriate size for their foot. If they are right on the edge of being too large for the size, size up.

NOTE: Extra Large extends beyond the edge of the chart. Some children’s feet may be too large for the largest size or too small for the smallest size.
