

POPSICLE STICK APPLE CORES

Lesson of the Day:

To really understand someone, you have to get to the core of them. You have to find the seeds, the things that helped them grow into who they are today. If you don't know who someone is in their heart, you don't really know them.

Materials:

- Popsicle sticks
- Colored pencils
- Green felt
- Red felt
- Brown construction paper
- Green construction paper
- Glue

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students glue two half popsicle sticks (pre-cut, as this is difficult to do) over the top of three popsicle sticks lined up. They should put one toward the top and one toward the bottom.
3. Have students cut half-circles out of red or green felt. Glue this on top of the half-popsicle sticks, covering them. This will make up the top and bottom of their apple core.
4. Have students add a construction paper stem and leaf.
5. Have students draw and color seeds in the center of their core.
