3D PAPER TREE

Lesson of the Day:

For a tree to grow strong and tall, it has to have strong roots. Without good roots in the soil, it can't get enough water and minerals to grow a big trunk, strong branches, or colorful leaves. You can build strong roots in your life by having good relationships with friends and family and being kind. That way you can grow up with love and happiness in your heart and your roots!

Materials:

- Template
- Brown cardstock
- Green paper
- Scissors
- Glue
- Ruler

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Each student will need four of the trunk templates on the brown cardstock. Have them cut the trunks out.
3. Fold the trunks in half and glue them together to keep them standing up.
4. Have students cut leaves out of the green paper.
5. Have students glue the leaves to the ends of the tree branches.
