

LOVE THE EARTH

Lesson of the Day:

We have to take great care of our earth to make sure that it takes care of us. We can't survive without a healthy planet, so we have to take care of it! Not just for ourselves, but for all the other people who live here too!

Materials:

- Paper plate
- Red paper
- White paper
- Blue markers
- Green tissue paper
- Google eyes
- Black markers

Instructions:

1. Discuss the lesson of the day with your students. Talk about what it means to them.
2. Have students color the entire paper plate blue with markers. After the entire plate is colored, have them glue squares of green tissue paper down in the shape of land masses to make an earth.
3. Have kids fold long thin strips of white paper accordion style for arms and legs.
4. Have kids cut a large heart out of red paper.
5. Have kids glue the arms and legs to the plate. Glue the ends of the arms together to the heart as well.
6. Have students glue down large googly eyes and draw a mouth with black marker.
