Start of Block: ID-choice

zlogtype The purpose of this survey is to gather your opinions on your graduate education. The information obtained from you and other students will help us identify strategies to improve graduate education. The survey is voluntary. You may answer as few or as many questions as you wish. Please be assured that the data are confidential, and the results of any research or analysis using the data will be presented in a way that individual respondents cannot be identified. For the purposes of analysis, we may combine other data with your responses to this survey. This survey is being administered as part of a consortium of peer institutions in order to gather comparative data. The results of this survey will be shared with institutional research offices at peer institutions. The use of the data at peer institutions is limited and requires that results are only used internally and in aggregate form. Occasionally, we receive requests to use administrative data sets—including survey results—for academic research projects. In those situations we remove direct identifiers (e.g. name or email address) before sharing with the researchers. Any researchers using these data for academic research are bound by the same
rules of confidentiality and reporting stated above. That is, they may not report results in a way that identifies an individual respondent. If you have any questions or issues with the survey, please contact phdexit@mit.edu. 

In order to record your answer, we need to identify you. Please choose a method of identification.
