

Heart Health Case Studies - Taiwan

Mr Liu

Mr. Liu is a 60-year-old businessman who has been living with arrhythmia for decades. His medical history also includes palpitation and angina pectoris. His busy business leads him to an irregular work and home life, and he often forgets to take his prescribed medications on time.

He suffers from dizziness and chest pain, which he describes as oppressive during a heart attack. These symptoms are made worse because of his busy lifestyle. As a result, he decided to use Cmate® H service to monitor his heart condition.

Mr. Liu measures his ECG every day before taking medication and after. He can monitor the results and receive reminders to take his medications with Cmate® H.

Using the device and service, Mr. Liu can be prescribed more precise medication, and better manage his heart disease.

Mrs Tsai

Mrs. Tsai is 39 years old with a history of frequent atrial premature contractions. Her doctor had asked her to take steps to reduce stress and suggested a regular pattern of life. By doing so, she could help reduce the need for long-term medication.

However, Mrs. Tsai's working and home life were extremely demanding, resulting in excessive stress which exacerbated her abnormal heartbeat, which caused physical discomfort. She decided to use CmateH to monitor her stress and fatigue.

Through regular use of the device, she can begin to understand her condition, recognise warning signs early and make changes to her lifestyle in advance in order to improve her health and wellbeing.

Mr Wang

Mr. Wang is 70 years old and lives a sedentary life. His medical history includes chronic heart disease and hypertension. He reports severe palpitations and dizziness during heart attacks.

His arrhythmia symptoms often occur during the daytime and last a short time. It's not necessarily convenient for Mr. Wang go to see his Doctor due to his poor mobility and also given the distance he lives from the hospital.

In order to make sure his heart condition is successfully managed, his children purchased the CmateH for daily monitoring in his own home. Mr. Wang has become familiar with the tablet and finds it very easy to use. He uses the CmateH for his daily monitoring at home, as well as chatting with his friends via WeChat or Line.
