Roots of Peace is dedicated to ridding the world of landmines and transforming minefields into thriving farmland. Landmines not only kill and maim innocent people but also impede a country’s economic recovery and development. Landmine removal is the first step in ROP’s mission to restore the livelihood of agricultural communities in mine-affected countries. During the past 10 years, ROP has worked in six countries: Afghanistan, Angola, Cambodia, Croatia, Iraq, and the Kyrgyz Republic. In 2007, ROP had active programs in Afghanistan, Angola, Croatia and the Kyrgyz Republic.
2007 marks the 10-year anniversary of Roots of Peace (ROP). We have now more than $26 million in funded programs committed or underway in Afghanistan, Angola, Croatia, and Kyrgyzstan. Thanks to 2007 revenues of $4.3 million—up from $3.1 million in the prior year—we were able to launch four new projects in Afghanistan. We continue to scale our agricultural programs in Afghanistan, which is projected to contribute more than $600 million per year to Afghanistan’s GDP within five years.

One of these new projects helped us reach a key milestone: we became a prime contractor managing the multi-year, $18 million Rural Business Support Program (RBSP) funded by Asian Development Bank. The RBSP contract award is the culmination of five years of helping Afghanistan build a competitive horticultural industry based on fruits, nuts, and grapes. As part of that process, we have assisted more than 25,000 Afghan farmers, processors, traders, and exporters in developing viable nurseries, improving production technologies, integrating better processing methods, and accessing new lucrative international markets.

In 2007 I was honored to meet with Croatian President Stjepan Mesinić who saluted ROP’s achievements. Since launching our first $30,000 demine/replant project in Croatia, ROP has completed six projects that have cleared nearly 500,000 square meters of land and removed 51 mines and unexploded ordinance in the villages of Dragalj, Bebina, Cista Mala, Cista Velika, Ilok, and Karlovac. We are now undertaking a new project scheduled in Zadar county for early 2008.

We also expanded our work to the Kyrgyz Republic to diversify our funding sources and geographic reach. In order to scale our organization to support this growth, we’ve grown to more than 230 outstanding team members, most of whom are Afghan nationals. We’ve hired key individuals to fill strategic roles and strengthened our infrastructure to support financial, human resources, and contact management.

We plan to grow steadily, expanding into post-conflict countries in Central Asia, Southeast Asia, and Sub-Saharan Africa within the next ten years. To fund this growth, we will look for support from a diverse mix of public agencies and private donors. ROP will continue to develop its expertise in perennial, high market value crops. We will also broaden our programs to focus on addressing related activities, covering the entire agricultural spectrum from policy to production, trade, credit, and branding.

We’ve accomplished so much in our first 10 years. When I visit the Homali region of Afghanistan, I see the effects of our demine-replant-rebuild model. The same fields we once cleared of landmines are now fed by water from the demined Parwan canal, and are producing fruits and nuts for new markets. This transformation is what inspires us to keep working to plant the roots of peace.

Heidi Kühn
Founder & CEO
Our Demine-Replant-Rebuild Model

The innovative demine-replant-rebuild model of ROP offers a comprehensive approach to restoring rural agricultural communities to economic self-sufficiency. ROP focuses on post-conflict countries where agriculture is a fundamental industry and major source of employment. Our demining programs clear landmines and remnants of war from fertile farmlands, agricultural infrastructure, and routes to markets so farmers can work their fields, process their crops, and sell their produce safely. Our replant and rebuild programs focus on the entire value chain and provide technical assistance, where needed, to farmers, processors and traders. We help them meet the demands of local, regional, and international markets in order to maximize their income. This benefits large numbers of smallholder farmers while stimulating service and supply industries such as trading, credit, processing, distribution, and agricultural input suppliers.
**Programs**

**Afghanistan**

Rural Business Support Program  
November 2007 through 2010  
Funding from Asia Development Bank

ROP is working in partnership with the Ministry of Agriculture and Irrigation to lead a three-year project to promote sustainable commercial agriculture with farmers, agri-processors, and traders for more profitable production, processing, and marketing industries.

Perennial Horticulture Development Program  
April 2007 through 2009  
Funding from European Commission

This two-year program to develop Afghanistan's almond industry focuses on the development of nursery systems that are to be managed by the private sector and guided by our national marketing plan that helps ensure preferred varieties are grown within each of the major producing regions. ROP is helping to document Afghan almond varieties and establishing a national germplasm repository to protect and maintain native almond varieties as well as imported commercial varieties. A network of private propagation nurseries in the major growing regions will cultivate new, clean saplings to help expand almond production in the country. A national industrial organization of almond farmers and merchants is being developed as the responsible group (in collaboration with the Ministry) for licensing and certifying plant nurseries to provide high quality planting material to farmers.

Accelerating Sustainable Agriculture Program  
December 2006 through 2008  
Funding from USAID

ROP continued efforts to help develop Afghan agricultural exports from the Shomali Plain, Herat, and Mazza-e-Sharif through focused work on high-value, sustainable crops that will increase income for rural farmers. This contract continues our work to improve fruit and nut processing which began under the USAID funded RAMP project (2004-2006). In 2007, we concluded work with trading groups to design, manufacture, and establish modern almond shelling units and processing plants that meet ISO standards in the primary growing regions of Afghanistan.

Alternative Development Program – East  
January 2007 through 2009  
Funding from USAID

ROP is developing commercial orchards as alternatives to poppy production. This program includes the establishment of private nurseries to propagate the best of local and imported varieties. The project goal is 3,000 hectares (6,000 acres) of new commercial orchards. Average new orchards are 100 trees on about an acre of land formerly used for grain crops. Farmers will choose from a wide range of fruits including apricot, pomegranate, orange, walnut, cherry, and plum. New citrus orchards will also be implemented throughout Afghanistan, the first since the conflict years. Our project includes vegetable inter-cropping during the early years to provide income as the saplings mature.
Alternative Development Program – North Orchard Project
April 2006 through 2009
Funding from USAID
Administered by AECOM International

To help increase rural farm income in the Badakhshan Province, ROP is conducting the planting and development of 1,000 orchards of almond, cherry, walnut, apricot and plum trees. The main focus of this program is the development of commercial nurseries to propagate local and imported varieties. Once planting of new orchards is complete, the program offers extension services for the new orchard farmers along with marketing extension services to develop new markets, many of them far from this remote region. This program is on track to improve the value chain in order to increase annual income for farmers from below $1,000 to above $3,500.

Alternative Development Program – South
Fall 2006 through May 2007
Funding from USAID
Administered by Chemonics International

ROP completed work in the Kandahar Province to provide direct technical support to the re-emerging grape and raisin industry. ROP worked in cooperation with the newly founded Fresh Fruit Exporters Union of Kandahar (FFEUK) and Dried Fruit Export Association of Kandahar (DFEAK) to promote the production of high-quality crops and manage trader-funded extension teams to train rural farmers in modern farming techniques. Our trade missions to Amsterdam, Kiev, Dubai, and India resulted in 2,240 metric tons of immediate test sales, and a total of 6,500 metric tons of test shipments of Afghan fruit and nuts that led to larger bulk shipments. FFEUK and DFEAK also received the business training needed to strengthen association management and establish a $1,000,000 line of credit. In partnership with FFEUK and DFEAK, we also launched a new website, www.afghangrown.org, as a forum to share market information and promote and sell Afghan products. The project also funded the reconstruction of 200 vineyards, Kishmish Khanas (raisin drying barns), and irrigation systems after NATO-Taliban fighting.

Roots of Peace Penny Campaign
Ongoing Campaign Initiated Fall 2004
Funding from private donations and AYENDA

Since September 2003, students from U.S. schools have raised over 15 million pennies ($150,000) for mine clearance, new schools, and playgrounds for Afghan children. In 2007, Mrs. Shamim Jawad, wife of the Afghan Ambassador to the U.S., and the International Chairperson of the ROP Penny Campaign, helped secure a $50,000 grant from AYENDA. AYENDA is the Afghan Children Initiative, a project of the U.S. Department of State US-Afghan Women’s Council. This generous grant allowed ROP to build a soccer field, four restrooms, and a wall enclosure surrounding the Kyleigh Kuhn Roots of Peace School, constructed by ROP. This school serves more than 250 students as well as the youth and adults in the surrounding community. ROP is extremely pleased to report that the Afghan Ministry committed additional funds in 2008 to build a new library and two additional classrooms at the school.
Successfully terraced winter wheat and vegetable fields in the Shomali Plain located on a former battle line of the Taliban vs. Mawad Forces conflict.
Angola

After recently concluding a 30 year civil war, Angola is a country that has been left with very little infrastructure for recreational activities. The neighborhood of Kilombo in the São José area of Huambo province has had difficulties in providing adequate sporting fields for its youth population. In addition to having to play on rudimentary fields with unhealthy playing conditions that often contribute to injuries, the youth are forced to play without any standard sporting equipment.

The neighborhood of Kilombo was one of the hardest hit provinces during the war due to its geo-political location. Kilombo is populated primarily by physically handicapped people whom have lost one or more limbs due to mine blasts or other war related traumas. The youth of Kilombo represent the children of these war ravaged people, with many of the beneficiaries of this project having lost either one or both parents as a direct result of the war and thus been orphaned. Therefore, these sporting fields serve as a needed distraction from all of the everyday hardships these youth have to deal with on a daily basis, effectively providing a constant in their lives and a safe haven.

In 2007, the Roots of Peace Soccer program funded by Roots of Peace rehabilitated a soccer field in Kilombo. The ROP Huambo Soccer Program will benefit a total of 120 youth between the ages of 8-17 (80 boys and 40 girls). The donation was facilitated through a grant to Catholic Relief Services (CRS).
Croatia

Following a private audience with His Holiness Pope Benedict XVI, on October 3, 2007, Croatian-born Miljenko "Mike" Grigich was inspired to generously donate $50,000 towards demining his homeland. The funds were doubled by the International Trust Fund (ITF) which created a DEMINE/REPLANT program in Basica, Croatia—literally translating into “Little Garden”. The Rotary Club of Zadar was instrumental in introducing Roots of Peace to the University of Zadar where a joint program was initiated.

Soon after the funds were secured, ROP Board Member Milko Glavic, coordinated a visit by the ROP team to assess the desired plot of land that was to be demined and replanted, generously providing transportation and logistical assistance to remote villages such as Basica, Dragalic, Vukovar, Karlovac, Sisak, and other areas where Roots of Peace has worked with the Croatian Mine Action Service (CROMAC). Roots of Peace Board Member Diane Baker, Director of the Academy of Arts and Motions Pictures, San Francisco joined the delegation to film a short documentary focusing on Roots of Peace programs within Croatia. With the trip concluding with ROP being the honored guest of His Excellency, President Stipe Mesic of the legendary vintners Robert and Margrit Mondavi, as this was one of his last fundraisers prior to his passing. The initial funding for our first Roots of Peace project was personally initiated by The Mondavi Family—raising the necessary funds to DEMINE/REPLANT the Medan Vineyards located on the former frontline of conflict between Croatia and Bosnia-Herzegovina. Through the “Legends of the Vine” such as Tor Kernward, Chris Benziger, Diane Disney Miller, Judy Jordan, Gina Gallo, Robert Mondavi, and Mike Grigich, we have truly turned “MINES TO VINES”—transforming blood to wine on the soils of Croatia.
The Kyrgyz Republic

Project Preparation Technical Assistance (PPTA)
of the Agricultural Land
Improvement Project in Kyrgyz Republic

ROP led a large consulting team in designing the Asian Development
Bank-funded Agricultural Land Improvement Project in the northern
provinces of Kyrgyz Republic from October 2007 until February
2008. The team, consisting of crop, livestock, agribusiness, pasture,
irrigation and rural infrastructure, environmental, institutional,
financial, gender and rural sociology specialists, assessed the current
use and management of the land and water resources and developed
alternative approaches for addressing the agricultural developmental
constraints and opportunities. This design project exemplifies the
effort ROP is making in expanding its mission into other countries
and regions that are prepared to increase rural incomes and improve
land productivity.
FINANCIALS

Overview

ROP’s financial position continued to strengthen during 2007. Program services grew by 37% over 2006, while overhead fell from 18.51% to 17.70%. ROP continues to work to reduce our overhead levels during 2008. For the year, ROP had a small loss of $1,969 leaving net assets at $65,010. ROP focused on two major financial improvements during 2007: diversification of donors and improvements in cash management.

After a funding gap in our programs during 2006, ROP embarked on a successful diversification campaign to expand the number of programs and donors. During 2007, ROP programs had grown from two to seven and our public donors had grown from one to four. Our total programs under contract at the end of 2007 totaled more than $46 million with funding from USAID, Asian Development Bank, European Community, and US State Department.

To address cash flow constraints, ROP negotiated better terms on new contracts and established a line of credit. These two actions have enabled ROP to better manage cash requirements to support our growing programs.

ROP has now established financial policies and procedures to better manage expansion. New IT systems including human resources and a donor database were implemented during the year. During 2007, ROP established reserve accounts for future programs. At the end of 2007 ROP had set aside $88,601 for demine/rebuild projects that will take place during 2008.

**Notes:**

1. **Accrued Liabilities at December 31, 2007 consist of the following:**
   - Contracts advance | $577,044 |
   - Accrued salaries | 129,911 |
   - Other Liabilities | 85,000 |
   - Accrued vacation | 31,280 |
   - Other accrued liabilities | 5,412 |
   - operating activities include interest paid of | $4,985 |

   **Total** | **$857,405** |

2. Roots of Peace has a revolving line of credit with a bank in the amount of $330,000 at a variable interest rate, currently at 9.00%, due July 2008. Total amount outstanding at December 31, 2007 was $347,000.

3. **Temporary Restricted Net Assets at December 31, 2007 consist of the following:**
   - Pennies for Peace | $30,861 |
   - De-mining for Croatia | 50,000 |
   - | $80,861 |

4. Fees from Government Agencies
   - Fees from government agencies for the year ended December 31, 2007 consist of the following:
     - Development Alternatives Inc. (prime to USAID) | $1,244,727 |
     - AECOM International (prime to USAID) | $1,100,068 |
