

# Roofing Range Guide

### Flashings for Metal/Glass/Plastic Roofs

### Dektite® Premium

#### Perfect for Flashing Pipes on Metal Roofs

The multi-application flashing in a highly durable EPDM or silicone, edged with a flexible aluminium band, flashes hot or cold flues and pipes on metal roofs. The square base fits any prepared hole on most roof profiles and material. Fixing kits (FX901 and FX902) are for mechanically fixing Dektite Flashings to metal roofs. The flashing adhesive should be used for securing the Dektite to glass or plastic roofs. The chart below shows which fixing kit you need for each Dektite.

Dektite Premium does not come corrugated, the base can be easily molded into the profile required.

			Code			Fixing Kit
Pipe External	Roof Pitch	Base Size	Black EPDM	Grey EPDM	Red Silicone	Qty
0-35mm	0-45°	100 x 100mm	DFE100B	DFE100G	DFE200RE	FX901 x 1

5-127mm	0-45°	221 x 221mm	DFE103B	DFE103G	DFE203RE	FX901 x 1
75-175mm	0-45°	280 x 280mm	DFE104B	DFE104G	DFE204RE	FX902 x 1
100-200mm	0-45°	310 x 310mm	DFE105B	DFE105G	DFE205RE	FX902 x 1
125-230mm	0-45°	363 x 363mm	DFE106B	DFE106G	DFE206RE	FX902 x 1
150-300mm	0-45°	456 x 456mm	DFE107B	DFE107G	DFE207RE	FX902 x 1
170-355mm	0-45°	496 x 496mm	DFE108B	DFE108G	DFE208RE	FX902 x 1
230-508mm	0-45°	681 x 681mm	DFE109B	DFE109G	DFE209RE	FX902 x 2

# Dektite® EZi-Seal™

#### Forget the Silicone - Just screw it down

Features a revolutionary non-absorbant and non-porous sponge gasket that seals by compression, even in wet conditions; it hugs the roof line to provide a watertight seal without the need for silicone sealants.

			Code	Fixing Kit
Pipe External	Roof Pitch	Base Size	Black EPDM	Qty
0-35mm	0-45°	100 x 100mm	DFE100BEZ	FX901 x 1
5-55mm	0-45°	139 x 139mm	DFE101BEZ	FX901 x 1
5-76mm	0-45°	178 x 178mm	DFE102BEZ	FX901 x 1
5-127mm	0-45°	221 x 221mm	DFE103BEZ	FX901 x 1

150-300mm	0-45°	456 x 456mm	DFE107BEZ	FX902 x 1
170-355mm	0-45°	496 x 496mm	DFE108BEZ	FX902 x 1
230-508mm	0-45°	681 x 681mm	DFE109BEZ	FX902 x 2

### Dektite® Diverter

#### For Hi/Low Roof Pitches

No ponding or damming! The large base of the Dektite® Diverter dramatically reduces and diverts rain water pooling, which can occur on very low- or high-pitched roofs and deep-ribbed roofing profiles.

Dektite® Retrofit™ Diverter (RFS4)

			Co	ode	Fixing Kit
Pipe External	Roof Pitch	Base Size	Grey EPDM	Red Silicone	Qty
75-155mm	0-60°	410 x 360mm	DF602	DF702	FX902 x 1
114-254mm	0-60°	485 x 460mm	DF603	DF703	FX902 x 1
254-406mm	0-60°	708 x 635mm	DF605	DF705	FX902 x 1
380-610mm	0-60°	1006 x 905mm	DF606	DF706	FX901 x 1 & FX902 x 2
235-425mm	0-40°	750 x 660mm	RFS4		FX902 x 1

Red and grey silicone will withstand constant temperature at the roofline of -50°C to 200°C and up to 250°C intermittently.

### Flashings for Metal/Glass/Plastic Roofs

# Dektite® Combo

Flash over or around

This is the swiss army knife or roof flashing - two flashings in one, use as standard Dektite®, or when retrofit is required, cut and fit around pipe and join with clips (supplied).

			Code

<sup>\* 350 - 500</sup>mm cut - the roof pitch is 30° maximum

# Dektite® Fixing Kits

Dektite® fixing kits are designed for use with DEKS EPDM and silicone flashings on metal roofs. The FX901 kit (as shown) contains 1x 75ml tube of low modulus silicone, 25x selfdrilling screws, 25x colour caps (silver) 1x fixing instruction leaflet.

The FX902 kit contains 3x 75ml tube of low modulus silicone, 75x self-drilling screws, 75x colour caps (silver) and 1x fixing instruction leaflet.

On the back page of the instruction leaflet is a table, which indicates which kit is required for each size of flashing. Self-drilling screws should be placed 25-50mm apart. Visit our website to find our fixing kit calculator.

Code

FX902

Download our fixing kit calculator spreadsheet. https://www.deks.co.uk/s/Fixing-Kit-Calculator-pdke.xlsx

# Flashing Adhesive

Our flashing adhesive is a one part polymer hybrid engineering-grade adhesive with primerless adhesion to most substrates and is formulated to adhere to Dektite® EPDM & silicone flashings. The adhesive reacts to atmospheric moisture to produce a long-life polymer hybrid rubber joint that is resistant to UV and will remain permanently flexible.

Temperature range: -50°C to +165°C

Code	
PFA-290G	

EPDM will withstand constant temperatures at the roofline of -50°C to 115°C and up to 150°C intermittently.

### Flashings for Metal/Glass/Plastic Roofs

Ideal for flashing square ducts and chimneys

# Dekstrip® Flashing

Stretches to any shape, Seals and Stays

Dekstrip is one of the most versatile and expandable lead-free flashing. Utilising a specially formulated rubber polymer and is offered in varying widths and roll lengths to suit multiple applications.

Used for expansion joints in walls, gutters and is an ideal flashing solution for large round or square penetrations, valleys, chimneys, bull nose roofs and skylights. Flash between different materials. The unique concertina aluminium edge allows it to stretch 25%. The surface is paintable thus making it an ideal roof flashing product for any application.

### Flashings for Flat Membrane and Bitumen Roofs

### FlatSeal™

Ideal for Flat and Low pitch Roofs with EPDM membranes.

For use on EPDM rubber roofs, using traditional primers and adhesives (not supplied). No additional clamps required as the extra-tight snap fit seal offers a watertight sealand a pipe penetration.

# FlatSeal™ Butyl

Ideal for Flat and Low Pitch Roof Applications for All Applied Roof Membranes.

No special tools or fittings are needed. FlatSeal™ snaps tight to pipe without clips and seals with self adhesive butyl base - refer to our website for the installation guide.

25 - 175mm	345mm	FS25-175
		Black NBR
25 - 175mm	345mm	FS25-175BU

EPDM will withstand constant temperatures at the roofline of -50°C to 115°C and up to 150°C intermittently.

### Flashings for Tile and Slate Roofs

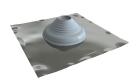

# Seldek® Aluminium

Installs in a flash on Tile or Slate Roofs

The Seldek® Aluminium won't stain or corrode roofs and gutters as Lead can. The EPDM cone, which is trimmed on site to fit, is ingeniously locked to a high grade and malleable aluminium base. This is the fastest economical way to flash a tile roof. Seldek Aluminium can be painted.

	<b>-</b> 4-500 I			Code
Pipe External	Roof Pitch	Base Size	Base Type	Black EPDM

# Seldek® Nu-Lead®

No more concern about unprotected Lead

Seldek® Nu-Lead® has been developed for use where the handling of lead and associated environmental issues are of concern. It combines a long-life, weather-resistant EPDM cone with a grey-primed acrylic-coated lead base. The unique thermo-baked coating does not affect the lead's malleability, and prevents leaching onto the roof and into gutters, downpipes and the water table.

	D (D)	5 0		Code
Pipe External	Roof Pitch	Base Size	Base Type	Black EPDM
12 - 70mm	0-45°	490 x 410mm	Nu-Lead	DNL101B

175 - 330mm	0-45°	850 x 550mm	Nu-Lead	DNL108B

EPDM will withstand constant temperatures at the roofline of -50°C to 115°C and up to 150°C intermittently.

### **Multi Surface Flashing**

Rapid Flash™

Replaces traditional lead-based flashings and incorporates a cleverly designed mesh that is free from toxic materials

The solution has been designed to suit metal, tile, slate, glas and most other roof types, while incorporating a paintable surface that can be adapted to suit different colours.

ı	<b>/</b>	۱,
	<b>/</b>	h

Lead free

Fully adhesive base

Reduces installation time by 50% compared to traditional lead-based solutions

Unique stretchable base that suits all roof profiles

Easy to install minimum tools required

Market-leading sealing system that you can trust.

**UV** rated

Comes in five Dektite sizes to suit all applications

### Perform Hammer

Specially designed for dressing Rapid Flash aswell as DEKS flexible lead free flashing.

Code	Description	Weight
HAMMER	Perform Hammer	0.5kg

Watch the Rapid Flash installation video

www.deks.co.uk/rapid-flash

Red and grey silicone will withstand constant temperatures at the roofline of -50°C to 200°C and up to 250°C intermittently.

### Flashings for Boiler Flues

#### Fully waterproofs boiler flues

Durable, high-quality polymer cone ensures a secure fit to the outer surface of both twin and single wall systems. These 2 items will fit all boiler brands where a roof exit is required. Available in a aluminium or lead base with an EPDM cone.

#### A size to suit every application

Comes with a large range - cover any boiler flue application with just one product!

#### Safe to use

Handle either of these great products without safety

Won't stain roofs or guttering No discolouration of flues or slates as Lead.

#### Environmentally Friendly

No leaching of contaminated water into our waterways as Lead.

# Can be painted to match the roof

Use a good acrylic paint (apply a polyester-etched primer first on SELDEK® Aluminium™)

### **Solar Flashings for Metal Roofs**

# Dektite® Premium

Perfect for Flashing Pipes and Cables on Metal Roofs

The multi-application flashing in a highly durable EPDM or silicone, edged with a flexible aluminium band, flashes pipes and cables on metal roofs. The square base fits most roof profiles.

Dektite® Premium Multicable DFE 101BM

Protects up to 12 cables and weatherproofs entry to any metal roof

Purpose-made durable solution, as required by MCS

Suits most roof profiles

Dektite® Premium DFE 101/201

Versatile flashing, accommodates up to five penetrations

Suitable for pipes and/or cables

High UV resistance

Dektite® Premium DFE 100/200

For solar pipes or up to three cables

Suits most roof profiles

Available in black and grey EPDM or red silicone

### Perform® Flexible Covering

## Perform® Flexible Covering

#### The perfect replacement for lead

Perform® is a composite consisting of aluminium mesh, embedded in a special type of polymer rubber. Both of these materials are environmentally sound and UV resistant. The material offers the same functionality of lead, has excellent stretching properties and provides a 'breathable' covering, which prevents the formation of condensation.

Non-toxic and much lighter than lead, Perform® meets all the demands of today's health and safety regulations.

To match various coloured tiles or slates, specifiers can now choose from four different colours. Grey and black are available in stock, with terracotta and brown available for special order. Stretches up to 60% in width and 20% in length.

No scrap value to potential thieves

Lightweight and easy to handle

Great form stability, easily cut and dressed

Available in two colours from stock

Use full roll without need for expansion joints

Perfect for flashing all types of structures, including car ports, conservatories and extensions

Ideal solution for flashing dormer windows and any other penetrations through traditional roofs

Great for flashing around traditional chimney stacks on any type of profiled tile or slate roof

Ideal for valley or box gutters

Ideal solution for flashing solar panel fixings and around roof lights

Perform® adhesive works on wet surfaces

### Fast Flash - Self-adhesive Flashing

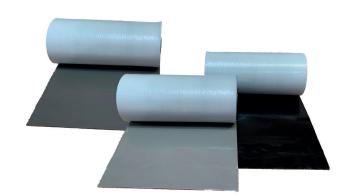

### Fast Flash

Self-adhesive and user-friendly lead replacement material

Fast Flash is ideal for any application requiring a quick and secure flashing solution.

Fast Flash can be installed on roofs with a minimum slope of 5° and on almost all roof materials. Fast Flash is environmentally friendly and easy to install, as the reverse is self-adhesive, as well as being flexible and very workable.

If painting is required or where water is likely to travel from copper or bitumen onto Fast Flash use 100% acrylic low-sheen exterior paint.

Easy to install
Light weight, easy to trim and fully self-adhesive

Slower-set adhesive
Allows time for repositioning

Flexible and very workable

Malleable and stretchable. Dresses well to all profiles.

Product range
Rolls in three standard sizes, and colours black, grey, brick red\* and anthracite grey.

(Grey colour matches old/worn lead. Anthracite grey matches new lead).

Environmentally friendly
Aluminium stretch netting cast in polymer rubber

Ideal solution for flashing solar panel fixings and around roof lights

Code	Description	Weight
HAMMER	Perform Hammer	0.5kg

# Flash Seal™

#### Effective sealing

FlashSeal is used for the sealing, protection and repair of flashing on roofs and is, among other things, well-suited for the treatment of bitumen-based products. FlashSeal can cover tears up to 5mm wide, applied in a thickness layer of 1.5mm and is waterproof after hardening.

- Sealing, protection and repair of flashing on roofs
- Suitable for the treatment of bitumen-based products
- Can cover tears up to 5mm wide
- Waterproof after hardening
- Contains: 1.13kg
- Great emergency roof/gutter fix

Product Code	Description	Weight
FS1000G	Flash Seal - Grey	1.13kg
FS1000B	Flash Seal - Black	1.13kg
