NOTICE OF PRIVACY PRACTICE

Understanding Your Health Record/Information
Each time you visit Missouri Vein Care, a record of your visit is made. Typically, this record contains your symptoms, examination and ultrasound results, diagnosis, treatment, plan for future treatment, as well as some demographic and insurance information. This information, often referred to as your health or medical record, or “chart”, serves as:

- a basis for planning your care and treatment;
- a means of communication among the staff who contribute to your care;
- a legal document describing the care you received;
- a means by which you or a third-party payer can verify that services billed were actually provided;
- a source of data for MVC planning and marketing;
- a tool which we can assess and continually work to improve the care we render and the outcomes we achieve.

Understanding what is in your record and how your health information is used helps you to ensure its accuracy, better understand who, what, when, where, and why others may access your health information, and make informed decisions when authorizing disclosures to others.
