WATER WELL PERMIT

NAME  TVA well #1

ADDRESS  2480 Hennington Ave

Number of wells 5

Is hereby granted permission to maintain a well in the City of Memphis or Shelby County, Tennessee for a period of one year in accordance with the rules and regulations adopted by the Ground Water Quality Control Board for Shelby County.

In accepting this permit the holder agrees to secure work permits before commencing construction on any new well or any alterations, additions, or repairs, to any well or part of the water supply system. No part of any such work shall be commenced until the Health Department has given approval. Additional permit conditions are on the reverse.

Dated this first day of January,

Display Permit in Water Plant or Well House
This well may only be operated under the Following Conditions:

1) For sampling for contaminants or further study of the potential connection between the shallow and deep aquifers. Such use may only be in accordance with investigational plans in connection with the TDEC-directed investigation of the remediation site. Approval must be obtained from this Department no less than 48 hours prior to the sampling or study event.

2) For emergency use where the MLG&W water supply has been lost. Such use is restricted to the minimum period to avoid catastrophic failure of the plant or serious damage or disruption to the regional power grid. Where possible, the Department should be notified as early as possible prior to such use, but in no case should it be more than 8 hours after starting any well.

3) For the periodic testing and maintenance of the and associated equipment. Such use is restricted to no more than 30 minutes of operation each calendar quarter. Approval to perform this work must be obtained from this Department no less than 48 hours prior to the work.
