

Manual Swing Barrier Arms

Hampden fabricate and install custom swing barrier arms for a wide range of applications. These are ideal for lower traffic sites, community facilities, sports grounds, schools and other public spaces.

Heavy duty barriers can also be engineered to your requirements for higher security sites.

Custom Fabricated Manual Barrier Arms

Hampden have a number of tried and tested designs for large openings with varying levels of security.

- Pipe type arms are cost effective and can be used to span a very large entrance.
- Heavier wall steel SHS sections can be used to create barriers that will withstand impact from vehicles.
- Galvanised and Powder Coated options available

Ideal Application

- Parks
- Sports Grounds
- Schools
- Car Parks
- Community Facilities
- Private Roads
