

Custom Design Fencing

Designed and fabricated in-house

Hampden is uniquely positioned to offer inhouse fabrication of custom fencing and gate products. Whether it's a fencing solution with architectural significance, or a job with specific cultural or design sensitivities, Hampden's experienced team can help to meet the unique requirements of your project.

Large Scale Projects

Hampden have the expertise and capabilities to deliver on large scale custom fences and screens. Our experience with prison perimeters translates directly to

large scale commercial and community projects. We have our own engineers to design and model in 3D, fabrication department to construct and a crane truck to assist our crews with the install. We can take a large scale custom fencing project from concept to fully installed!

Culturally Sensitive Projects

Hampden has been involved with a number of high profile, culturally sensitive projects, such as fencing on historic pa sites, and is able to call on this experience whenever required. As these projects typically require greater levels of planning and customer input, we assign a dedicated team to successfully manage the job through to completion. Our solutions are developed to be sensitive to the environments in which they will be placed, and we are committed to enhancing the spaces in which we work. This may mean unique one-off bespoke fabrication which is no problem for our experienced team.

Ideal Application

- Walkways
- Bridges
- Parks
- Cultural Projects
- Schools

You will generally only need a building consent for fences over 2.5m. However you may still need a resource consent for some fences below this height. Contact local council to check the specific height restrictions and design requirements for your local area.
