

Privacy Screens

Traditionally used to hide unsightly services from view or obscure valuable or sensitive installations while providing airflow and light. Modern aluminum screens look great for years without needing maintenance while more traditional materials such as steel and timber offer a structural alternative. Hampden has extensive experience with custom screening for applications ranging from commercial and education sectors right through to correctional facilities.

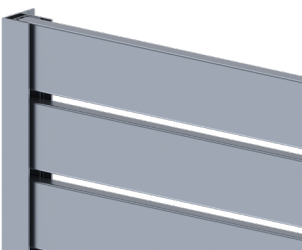

Ideal Application

- Services Areas
- Correctional Facilities
- High Security Areas
- Schools
- Hospitals

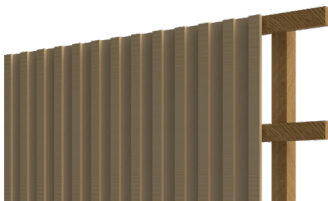

Slat Aluminium Privacy Screens

Aluminium slat panels can be custom fabricated to suit any size space. The slats spacing can also be varied to create different levels of air flow and visibility. Narrow 10mm gaps are very private, 16mm gaps are great for airflow.

Timber Privacy Screens

Timber privacy screens can be custom designed and erected on site.

You will generally only need a building consent for fences over 2.5m. However you may still need a resource consent for some fences below this height. Contact local council to check the specific height restrictions and design requirements for your local area.

For more specifications and information please visit www.hampden.co.nz or call the Hampden team.

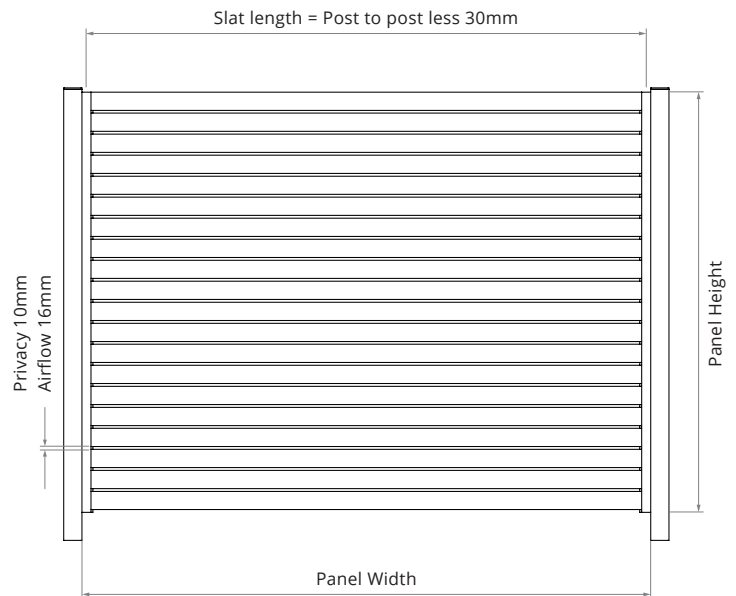

Privacy Screen

Horizontal slats provide great privacy screening as infill on block walls, gates and screening around services. Choose from privacy spacing with narrow 10mm gaps or airflow spacing with larger 16mm gaps.

Aluminium Screen Specifications

Slats	Height w/ 10mm Gaps	Height w/ 16mm Gaps
No. of Slats	mm	
10	740	794
11	815	875
12	890	956
13	965	1037
14	1040	1118
15	1115	1199
16	1190	1280
17	1265	1361
18	1340	1442
19	1415	1523
20	1490	1604

Specifications

Material:

- Aluminium
- Slats: 65 x 16 x 1mm
- C - Channel
- F - Profile

Finish:

- Epoxy Powder Coated

Recommended Post:

- SHS 50 or Masonary Pillar

Rail Brackets
