The Census Bureau, a federal statistical agency of the United States government, conducts five decennial censuses of the population of the United States: the 2020 Census (for the year 2020) and four other censuses for years ending in 0 and 5 (the 2010, 2000, 1990, and 1980 censuses). The 2020 Census, which was the 12th decennial census, was conducted in 2019 and 2020.

The 2020 Census was the first census to be conducted primarily through self-administered online or paper questionnaires. It was also the first census to use a new technology called the “computer-assisted personal interview” (CAPI), which allowed interviewers to conduct interviews remotely using a tablet computer. The 2020 Census was the first census to be conducted in the age of the internet, and it was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted in the age of the smartphone, and it was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.

The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components. The 2020 Census was the first census to be conducted entirely in the United States, with no overseas components.
