HEALTHY POO
Oval shaped with a uniform consistency. Colour should be medium to dark brown.

GREENISH POO
This can be cecal pellets which your guinea pig will re-ingest. Perfectly normal for him to gobble this up.

CLUMPY POO
Possibly a sign of a gut issue or your guinea pig’s rectal muscles may be aging.

TEAR-SHAPED POO
Small and dry poo can be a sign of dehydration.

BLOODY POO
There could be an obstruction, inflammation or tear in the anus or GI tract. See a vet immediately!!!
