

Keep Veterans at the Center
of Highly Reliable Care

ORDER TRACKING MANAGER

ONCOLOGY MODULE

KEEP VETERANS AT THE CENTER OF HIGHLY RELIABLE CARE WITH ORDER TRACKING MANAGER

Order Tracking Manager is a web-based, Veterans Health Information Systems and Technology Architecture (Vista) - integrated solution that leverages real-time data to provide clear oversight and task management for staff and administrators. With one specific location for this data, OTM helps avoid delays in patient care and extra work for administrative and medical staffs.

This suite includes five unique modules:

Pharmacy

Lab

Radiology

Oncology

Dermatology

ACHIEVE HIGHLY RELIABLE VETERAN CARE

**SENSITIVITY TO OPERATIONS • PREOCCUPATION WITH FAILURE • RELUCTANCE TO SIMPLIFY
• COMMITMENT TO RESILIENCE • DEFERENCE TO EXPERTISE**

OTM supports VA's journey to becoming a High Reliability Organization (HRO) by providing multidisciplinary teams the opportunity to collaborate, placing patients at the center of care through operational efficiency and maximized care quality.

HRO-centric Features

- Critical code tracking, order status tracking
- Visibility of patient data in one location to improve planning and communication across managed care teams for better outcomes
- One-click filtering options for more efficient workflows
- Fast access to detailed patient information
- Customized worklist displaying real-time data through bi-directional interfacing
- Display of critical lab values

LEVERAGING BI-DIRECTIONAL REAL-TIME DATA

OTM is designed to meet the unique demands of different workflows. A customizable Today Screen shows a filtered Worklist of different order types. A Metrics Dashboard provides real numbers in real-time. All relevant data from the different Worklists are presented in one easy-to-navigate screen, enabling users to drill down for an even closer look.

KEEP WORKFLOWS IN MOTION

Administrators can assign tasks to user roles, specific users, or clinic locations. OTM tracks the progress of every task from start to finish. For recurring tasks, OTM automatically reschedules by frequency, making things easier, and keeping everything and everyone on track.

Oncology Module

FEATURES AT A GLANCE

- The application is designed to be an Electronic Patient Tracking Board (dashboard) to help Infusion Clinic providers, nurses, pharmacists and staff including administrative personnel, have a centralized real-time view of patient data to improve workflow in Infusion Clinics and to prevent delays in patient care.
- The application can be viewed/accessed at the nurse's station, in pharmacy, on individual desktops, in clinic rooms or modified view for patient waiting rooms so up-to-date dashboard of patient movement can be seen by all.
- OTM Oncology will help address issues with staff and providers logging in and out of email, dealing with mix-ups on which patients have been cleared for treatment, patient names missed, and unnecessary overtime for the nursing staff.
- OTM Oncology Infusion Worklist will provide simplified views to see the progress of a patient within the Infusion Clinic. At a glance, staff will be able to see if the patient has checked in, who is assigned to the patient (Doctor/Nurse), type of appointment, see if med orders have been Verified or Released, what Labs have been collected and if they have resulted, as well as the assigned chair.
- Color coded Indicators will be available to let the Nurse know when Pharmacist has completed each med order.
- Nurses will be able to control the start and stop times for each patients' Infusion times and chair time.
- From the Infusion Worklist, user will be able to perform the following actions:
 - Chair Management feature allowing user to assign nurse, chair & approx. time of treatment and designate patient port type/location
 - View Medication Order status (Verified, Ready, Rejected)
 - View collected and resulted Labs
 - Mark patient as Ready to Treat
 - Set Chair Reservation
 - Start/Stop timer for Chair time
 - Start/Stop timer for Infusion time
 - Add comments
 - Create Progress notes, add addendums, add additional signer & sign writing back to VistA
 - Ability to view Treatment Plan
 - Schedule Patient in VistA
 - View Chair Resource Schedule
- Patient Waiting Room Dashboard
- At-a-glance views of the following:
 - MD
 - Fellow
 - Nurse
 - Appointment types
 - Patient check-ins
 - Status of Active/Signed med orders on appointment days
 - Lab draws and results
 - Reserved Chair
 - If Patient is Ready to Treat
 - Port Type
 - Chair Time
 - Infusion Time
 - Comments
- One-click filtering options
- Customizable worklist
- Fast access to detailed, updated patient information:
 - Progress Notes
 - Labs
 - Medications
 - Visits/Appointments
 - Orders
 - Consults
 - Pathology Reports
 - Allergies
 - Postings
 - Active Problems
- Metrics screen shows real-time Infusion Clinic data
- The worklist is filtered into specific buckets of information for easy views of information:
 - Location
 - MD assignment
 - Nurse assignment
