

References: Tremendous amounts of information on Harvesting Vegetables, Growing Seasons, and Gardening in general can be found on the internet. Regretfully, much of it is of limited quality or value. To help refine your search, try adding the term site:edu to your search to focus on Extension publications and other research based information. A slightly broader range of material (yet still filtered of much of the undesired results) can be found by using the alternate “Google Scholar” site at www.scholar.google.com .
