Book:

Pruning & Training, The American Horticultural Society, Christopher Brickell & David Joyce.

Choose the right plant for the right place!

Plant correctly—don't put a \$100 plant in a \$10 hole! Hole should be 2 - 4 times wider than the root ball and slightly shallower.

Do **NOT** use soil amendments in the planting hole. The only thing that should be backfilled with the plant is the original soil and water.
