

Dear Applicant,

Logan Schools Foundation's mission is to "improve the lives of young people and strengthen our community by enhancing the educational opportunities available to all students in the Logan City School District." We provide funding for programs and projects which are designed to ensure that all students have access to a quality education.

In 2018, the Logan City School District Board of Education created the Art Enhancement/Art Experience Endowment from the proceeds of sold art pieces owned by the District.

This endowment is intended to

- allow students to apply for assistance in pursuing District approved art experiences
- allow teachers to apply for grants to enhance the art education experiences in their schools and classrooms
- provide ways to expose students to art experiences that otherwise might not be available due to budgetary constraints.

At this time, the committee has not created any firm grant amount request amount, but as this process begins, it is anticipated that grants in the \$100 to \$1000 would be considered.

We look forward to seeing the creative projects you would like to use in your classrooms and school to make art education real. Please feel free to contact me if you have any questions.

Shana.longhurst@loganschools.org or X1501.

Shana Longhurst
Executive Director
