A Sanborn fire insurance map from 1900 depicts two female wards and operating rooms (buildings 502-505) within the APE, as well as a reservoir and engine room structure indicated as “being built” to the west of the female wards. The women’s wards and operating rooms are indicated as constructed of brick, with two-and-three-story wooden passageways connecting each structure, and as having tin or slate roofs. The west wing of the women’s ward is shown as having two stories with an attic, and a small three-story rectangular extension connected to the western side via a two-story wooden passage. The north wing of the women’s ward is three stories and has a similar rectangular extension on the northern side, made of wood instead of brick. The central operating rooms of the women’s wards appear to have a one-story wooden porch on the southern face.

Date Constructed; 1883

Date Demolished; 505 in 1968
502, 503, 504 in 1974
