# INNOVATION
ECOSYSTEM

The Innovation Ecosystem is Treehouse's tool to transform your supply chain into an agile network that is able to share, discover and co-develop ideas, develop and submit the best proposals. It delivers where it matters most – turning these ideas into real solutions that satisfy your needs and those of your clients.

Created and managed by Treehouse the Innovation Ecosystem tool is designed to:

Create and ready the network
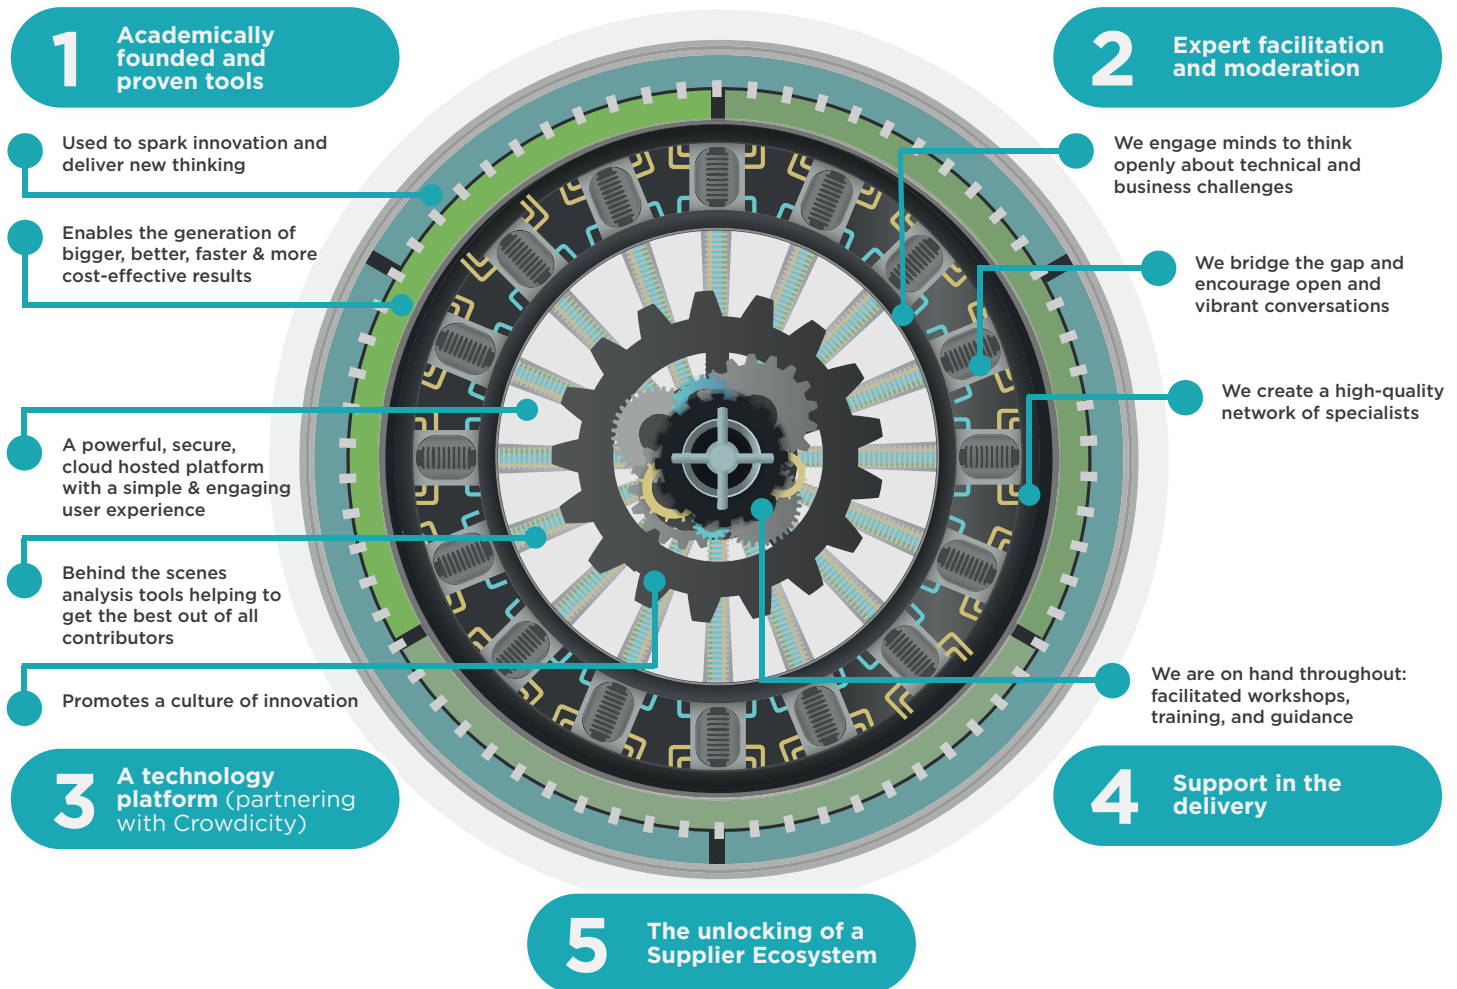

Develop and submit winning proposals

Share, discover and co-develop ideas into new solutions

Bring new ideas to market

Our methodology is based on our experience supporting Defence since 2006 with innovative new programmes, training, consultancy and task management, as well as first hand experience of being an SME within the Defence supply chain. The process has been tried and tested, delivering real results in increasing innovation within supply chains.

The Innovation Ecosystem includes:

1 Academically founded and proven tools

Used to spark innovation and deliver new thinking

Enables the generation of bigger, better, faster & more cost-effective results

A powerful, secure, cloud hosted platform with a simple & engaging user experience

Behind the scenes analysis tools helping to get the best out of all contributors

Promotes a culture of innovation

2 Expert facilitation and moderation

We engage minds to think openly about technical and business challenges

We bridge the gap and encourage open and vibrant conversations

We create a high-quality network of specialists

We are on hand throughout: facilitated workshops, training, and guidance

3 A technology platform (partnering with Crowdicity)

4 Support in the delivery

5 The unlocking of a Supplier Ecosystem

The programme creates an ecosystem that enables you to reach and leverage the most innovative suppliers

We will work with you to define a tailored programme that best suits your business, challenges and supply chain.

TREEHOUSE
Empowering people, unlocking opportunity
