

Spirit-led Childhood

Enkindling the Flame of Our Hearts to Meet the Children of Today

Developing the Self
Developing the World

Full conference (Ttl 15 sessions)
Last weekend in February

The conference offers a deepening awareness towards understanding the essential spiritual foundations that underlie a spirit-led life. Through education, we can work with the unfolding future in the present moment, creatively and with guidance from the spirit. As the next generations become more individualised, our task in education grows to meet them.

We will explore how we can work to perceive the child as an unfolding individual through stages of growth and development from early childhood to adolescence. Educators, health practitioners, artists and gardeners work together to offer workshops for weaving life into the curriculum to support future generations towards a living relationship with the spirit as they grow and develop throughout their adult life.

Conference Fee
