Community Planning

The Regional Planning Commission of Greater Birmingham helps local municipalities to improve residents quality of life through thoughtful community planning. We work directly with mayors, city councillors, and planning commissioners to define a city's overall vision for growth. Together we prepare a citywide comprehensive plans; downtown revitalization plans; zoning updates and design guidelines to be used as a blueprint for the future. These plans can help answer, “Where should future housing and business growth occur?” “What types of transportation investments are needed?” “What changes are necessary to create more businesses and jobs?” and “How can public services and infrastructure be enhanced?” Our planning process is highly collaborative and interactive. We utilize online and face to face public involvement techniques to gain a snapshot of what is going on in the community today and to ensure that plans reflect your ideas and priorities. Our team can address a range of topics including zoning, future land use, green spaces, transportation, and community services. Recommendations include goals and actions to provide a strong foundation for implementation. To ensure that the future of your community is appealing and competitive.
