What are businesses looking for?

Insights from ISSP’s 2015 Sustainability Hiring Survey

Dorothy Atwood
ISSP Co-founder and Board Member
ISSP Sustainability Hiring Survey

What we wanted to know:
• What skills and attributes are organizations looking for when hiring a sustainability professional?

Why we wanted to know it:
• Guidance for our members: aspiring and seasoned professionals
• Learning objectives for training and education
• Validation of ISSP professional certifications
• Relationship to ISSP 2010 Competency Study

www.sustainabilityprofessionals.org
Methodology

- **Target audience:** Sustainability hiring managers and HR professionals
- **Web-based deployment:** summer/fall 2015
- **Distributed through membership, partner organizations (e.g. AASHE) and LinkedIn networks (e.g. Sustainability Professionals – 100,000+)**
- **Sample Size:** 213
- **Administered in English only**
- **Supplemented with one-on-one interviews**

Top ‘hard’ skills desired

“Project management, innovation, try and try again, and engagement are most important.”

Top skills from 2010 ISSP Competency Study:
1. Strategic planning
2. Systems thinking
3. Project management
Top ‘soft’ skills desired

“In an academic environment it is of critical importance that a sustainability professional is able to engage others on a voluntary basis, using a grassroots approach.”

Top skills from 2010 ISSP Competency Study:
1. Communication
2. Problem Solving
3. Motivating and Inspiring

www.sustainabilityprofessionals.org
“With the growth of sustainability programs at the undergrad and masters level across the country, we are seeing more and more qualified candidates with masters degrees, PhDs, and very interesting work experience. It’s competitive.”
"An ISSP CSP certification wouldn't automatically put someone on top of the list of candidates, but it would definitely help tip the scales in differentiating from other potential candidates."
"The key to hiring a sustainability profession is finding the person with the right attitude and aptitude, along with a passion for change, inclusion and flexibility in the work environment."
Preliminary Conclusions

• Change management is key.

• Don’t forget the soft skills, especially communication!

• Education is important – coupled with experience and passion

• Certification – nice to have

“We can train them in subject matter, but we cannot train them to be good communicators”

“Passion and ability to influence change are key”
