Your kids already play video games...

WHY NOT MAKE IT PRODUCTIVE

This school year holds many unknowns and obstacles, however consistency lies within the Esports community, giving students that sense of unity. Make Esports the definite aspect in your child’s life this school year. They can socialize and interact with students across the country, while participating in educational tournaments.

Does Your School Have an Esports Team?

Click on the map to see if your child’s school is already part of the High School Esports League.

Don’t see your school? Talk to your child’s principal and be the next to join the Esports community!

What is Esports?

- Professional live competitive video gaming involved in thousands of global tournaments annually.
- Young cyber athletes learn through gaming in a safe environment, developing stamina and preparation for the real world.
- It’s all about community and bringing people together.
- Have your child be a part of something they are proud of!

What is ENN - Esports Education Network

EEN is an open network, allowing anyone to submit content and material for accreditation. Accredited content will be featured on the network along with VEF’s own original content. We also work with TOs, organizations, and school districts on package deals where we can put custom packages together depending on the level of training or certification they would like out of their employees. We will also partner with companies who are in the certification and educational space on partnered content that can come on board as contributors.
Our primary goal is to further STEM education by using new teaching methods, while harnessing children’s natural desire to play games.

Who Are We?

The Varsity Esports Foundation (VEF), founded in December 2018, is a 501(c)(3) organization established to offer financial assistance to schools and provide a channel for students to reach their potential through esports. The VEF strives to promote the industry’s positive impact on healthy lifestyles, mental health, community and STEM through literacy.

The VEF approves of the organizations below as the best options to help you start your school’s esports program. The High School Esports League (HSEL) and Middle School Esports League (MSEL) (new this fall semester), managed by Generation Esports, a technology platform, will work with coaches, sponsors, parents, administrators and districts to provide the best opportunities for their students.

Our Preferred Scholastic League Partners

High School Esports League

High School Esports League (HSEL) is the largest and longest-operating youth competitive gaming organization, serving over 3,000 schools and 80,000 students across the United States and Canada. STEM.org certified, HSEL hosts systematized video game competitions, adhering to strict rules and guidelines which foster an environment that positively impacts students.

LEARN ABOUT HSEL

Middle School Esports League

Launching this fall semester, Middle School Esports League (MSEL) safely guides young teens into the world of competitive gaming. The program focuses on building teamwork, comradery, and dedication among students. Similar to HSEL, the Middle School Esports League is supervised and organized, creating an inclusive environment for students to thrive.
