Make-Your-Own Glass Workshops
with Studio Manager Chuck Burton

Choose from Flameworked Beads, Fused Glass Small Plates, or Fused Glass Garden Art. A perfect answer for a creative group get-together. Schedule a three-hour glass workshop today (schedule dependent on Glass Studio Manager availability).

What’s required?
- A minimum of four people, but not more than 10.
- Everyone must be 14 or older.
- An interest in glass art. No experience required!
- Member and Early Bird discounts not applicable for Make-Your-Own Glass Workshops.

Call 952-563-8575 to schedule your workshop

Flamework Beads

Flamworking workshops are designed to teach students the basics of bead making on a small torch. Students will learn how to safely operate flamworking equipment and learn about torches, fuels, and tools as well as properties of different glass types. Students will learn to manipulate glass on the torch to make basic bead shapes with various attributes and decorations. No previous glass experience is necessary. Please note that students are required to wear all natural fibers (cotton, linen, silk, etc.) and closed-toe shoes. Long hair needs to be contained/pulled back. We recommend students bring a drinking container for water and a sketchbook for notes. Safety glasses will be provided for use. Due to use of open flame, molten glass, and gas, this workshop may not be suited for those with unsteady hands or scent sensitivity.

$75 per person (supplies included)

Fused Glass Small Plates

Make your own pair of 5-inch plates in this fun one-session workshop. Start with a pre-cut blank, and embellish with scrap and sheet glass, frit, and stringers, learning safety, design, and cutting techniques along the way. The instructor will fuse, then slump the students’ work. All materials and equipment use provided. Please wear closed-toe shoes. Finished work can be picked up 1-2 weeks after class.

$58 per person (supplies included)

Fused Glass Garden Art

Students will learn the basics of cutting sheet glass and design outdoor suncatchers and/or plant stakes. Safety, design, and cutting techniques will be covered and the students will work with precut blanks, scrap and sheet glass, frit and stringers, and copper tubing and wire. The instructor will fuse students’ work. All materials and equipment use will be provided. Please wear closed-toe shoes. Finished work can be picked up 1-2 weeks after class.

$58 per person (supplies included)
