Seal leaky windows with shrink-to-fit plastic wrap.

[>>See instructions](#)

Buy a tankless water heater which can be 30% more efficient

[See available products<<](#)

Insulate hot water pipes

[>>See instructions](#)

Wash clothes in cold water - modern laundry soaps don't need hot water to clean.

Turn down your hot water temperature to 49°C (120°F)

[>>See how](#)

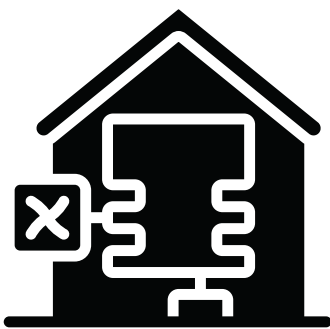

Install a smart or programmable thermostat - and program it!

[View different brands<<](#)

Drop temperature 4-5°C at night and when you're away from home.

[>>Tip: set a regular phone alarm as a reminder.](#)

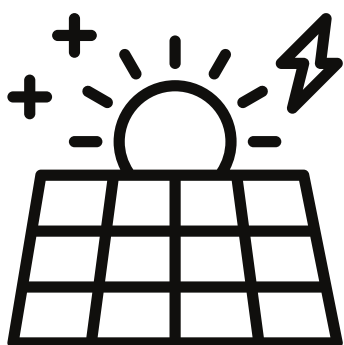

Consider installing a heat pump, which acts as both a heater and air conditioner and is more efficient than a furnace.

[Info<<](#)

Change furnace filter regularly and have furnace cleaned by a qualified technician.

[>>How to change a filter](#)

Install a solar system. With available rebates and Solar Club, you could pay off your system in as little as 7 years.
