

CURATING A WORKSPACE THAT WILL HELP YOU BE MORE PRODUCTIVE AND EN-JOY WORKING MORE

Working from home is great. Working from an inspiring home workspace is even better! Besides the freedom to work in pajamas (because no one cares, especially you) you also have the freedom to create your own little work haven. A dedicated space where you feel comfortable, inspired, and get things done. I believe that a home office has to be three things: functional, inspiring, and tailored to your needs.

Inspired by my e-design clients need for a beautiful soulful workspace

No matter whether your office is a dedicated separate room, a desk in the corner of your living room, it should be a comfortable place that inspires you. It should be distraction-free and fully equipped with items you need to get your work done.

Here are some tips to get you started

Take an honest assessment of your existing workspace and determine if it gives you joy and if it doesn't then use some of my suggestions to elevate the energy and beautify the area.

You want to think about the design of your personal work area to reflect your brand as much as possible in color and style.

This will create an immediate opening for action when needing to do a video or face book live.

You want your audience to see you surrounded by success and your brand essence.

Comfort

Invest in a good desk and a good chair that is solid and big enough. Paint a wall in your personal success color to elevate the energy.

View

Position the desk to have some type of view and not facing a wall (If you have to face the wall, put a mirror to place you in the command position).

Environment

Add plants nearby to clean the air and make sure you have good lighting (A lamp on the desk or nearby helps).

Screen

Laptops are ok, but try adding a 24" monitor to allow you to work bigger and experience a great energy expansion.

Flow

Music is essential to productivity and flow. Sign up for pandora and purchase a Bose set of high quality sound speakers. Your work life will flow better grooving to the right music.

Details

Surround yourself with inspiring details like flowers, crystals, objects that reflect back things you connect to.

Tools

Have plenty of notebooks and great writing pens nearby so when you are prompted to journal or hand write inspiration that is coming in you can do it easily.

Camera

Make sure you have a good quality video camera for those zoom calls and FB lives.

Organize

Have an organizational system that keeps your papers and various other details in a place so you know where things are.

To elevate the energy in your workspace ask yourself the following questions:

1. Does my workspace bring me joy?
2. Am I working in the right space at home?
3. Should I situate my workspace somewhere else?
4. What is the first detail that I'd like to change about my current workspace to make it feel better?
5. Does my office color and style reflect my brand/business?

Enjoy enhancing your workspace to feel much better and help you work more creatively and in the flow!

If you need additional help creating a fabulous workspace let's get in touch!
