Know before you throw!

Clean & empty recyclables
Empty & rinse materials before recycling them. Dirty material contaminates a recycling bin and all the products inside it.

Check for plastic grades
Stop and read the sign - what plastics can the bin take? Refer to the identification code 1 - 7 on the bottom of your item. If there’s no sign, look up your council’s requirements.

Coffee cups are never recyclable
Unless your club offers a designated commercial composting bin and uses a commercial composting facility to dispose of it AND the cup is 100% compostable, coffee cups have to be thrown into LANDFILL. Biodegradable cups are neither compostable nor recyclable.
