

Fungus & Insect Control

Edibles

INSECTICIDE (Edibles)

Captain Jacks (Bonide)

organic, foliar spray, controls a wide range of insects, safe on edibles. Insects will stop feeding immediately but may take several days to disappear.

All Seasons Horticultural & Dormant Oil Spray (Bonide)

Use early spring in place of dormant oil as well as year round at the lower rate. Highly effective on scale insects, also helps protect against diseases. Can be used on houseplants & tropicals.

Fruit Tree & Plant Guard (Bonide)

Begin spraying fruit trees after bud break then spray after the flower petals fall. Follow regular schedule per the label. This spray is a broad spectrum disease and insect preventative. Effective on downy mildew (impatiens).

Sluggo Plus (Monterey)

organic slug & insect control, great for any crawling insect, safe on edibles and around pets. Ants, earwigs, cutworms. Start using early to keep slug population at bay.

FUNGICIDE

Copper Fungicide (Bonide)

organic, helps prevent early blight, downy and powdery mildew. Use on tomatoes from the time of planting every 7 days.

NUTRIENT DEFICIENCY

Rot Stop (Bonide)

spray on foliage, aids in preventing blossom end rot on tomatoes and peppers. Liquid calcium helps correct calcium deficiency due to soil deficiency or moisture fluctuations.

GROWTH HORMONE

Blossom Set Spray (Bonide)

helps blossoms set fruit despite poor weather, helps blossoms produce larger, meatier, seedless tomatoes and ripen up to 3 weeks earlier. Uses natural plant hormone Kinetin.
