Statement from Anne Reynolds, Executive Director of Alliance for Clean Energy NY (ACE NY):

“There is no doubt that New Yorkers support clean air and climate action, perhaps now more than ever. And the renewable energy industry is ready and willing to invest in New York. Wind and solar power projects will create good jobs to sustain New York families. Now that the New York Public Service Commission and NYSERDA have released this Clean Energy Standard White Paper, all the stakeholders can weigh in on the plan and schedule to achieve 70% renewable electricity by 2030, as required by New York’s landmark 2019 climate law. We look forward to reviewing this proposal and working on the roadmap that will attract clean energy development dollars to New York, create good paying jobs and achieve its nation-leading renewable energy and climate standards. We commend New York for continuing to move ahead with its clean energy programs even in the midst of the nation’s health and social crises.”
