Collateral health effects of COVID-19

- Redeployment of staffing for COVID-19
- Decrease in primary care physician visits
- Underinsured and uninsured
- Local outbreaks

**Higher Impact**
- Healthcare infrastructure overburdened
- Medicines diverted for COVID-19 treatments
- Supply chain of non-COVID-19 medicines disrupted
- Disease treatment deferred

**Lower Impact**
- Failure to seek urgent/emergency care
- Increased need for mental health and substance abuse services

**Infectious diseases**
- E.g., malaria, tuberculosis, HIV/AIDS

**Chronic diseases**
- E.g., lupus, cancer

**Preventative outbreaks**
- E.g., measles, mumps, rubella

**Acute illnesses**
- E.g., heart attacks
