Are you an ambitious **Structural Engineer** looking to join a distinctly innovative group? Looking for an opportunity to work shoulder to shoulder with architects as a valued team member? This is a great opportunity to join a team of professionals who are committed to creating meaningful architecture and engaging the communities we serve.

**Integrus Architecture** is a group of Architects, Structural Engineers, Interior Designers, and Business Professionals committed to an integrated approach toward meaningful and lasting design. By creating buildings that add significant value to the communities in which they’re situated, we hope to make the world a better place – for everyone – to live, to work, and to learn.

**What You Will Do:**
The Structural Engineer will conduct structural analysis and design of steel, concrete, masonry and wood building structures using governing codes including construction administration under the direction of the Principal Engineer. This position offers an excellent opportunity to develop strong technical and communication skills while working with the design team on a variety of interesting and challenging projects. You will also have opportunities for professional development and community involvement.

**Your Qualifications:**
- Bachelor’s degree in Engineering (Structural); Master’s Degree preferred.
- Professional Engineer license a must, Structural Engineer license preferred.
- At least 8 years working with building structures.
- Excellent professional writing and communication ability.
- Experienced in Revit, RISA 3D, RAM, and ETABS.

**What We Give You:**
- A fun, collaborative working environment.
- Employer paid insurance to include medical, dental, vision, life and disability.
- Paid holidays, vacation and sick leave.
- FSA plan with dependent care and transportation options.
- 401K retirement plan, with company match.
