WHO WE ARE
Comp-U-Dopt has been providing technology access and education since 2007. Founded on the belief that all children deserve equal access to tools and opportunities, we’ve delivered over 90,000 hours of technology education, distributed over 15,000 computers, and served nearly 20,000 economically disadvantaged youth. Because the technology we distribute is donated equipment from corporations we’ve also kept 120 tons of e-waste out of landfills.

OUR COMPUTER DRIVE-THRU
In response to the COVID-19 pandemic, Comp-U-Dopt is setting up computer drive-thru’s in Chicago, DC, Dallas, and New Orleans in addition to our Houston site, to get computers into the hands of children without access to a device at home. These students are at risk of losing months of education opportunity as compared with their peers as schools continue to remain closed. Parents simply register on our website to enter a lottery then if picked are given a date and time to receive their device. The computers are theirs to keep and 100% free of charge.

THE NEED FOR THIS WORK
- About 10 million children across the US lack access to a computer at home.
- In Houston alone over the past 10 days since starting this project we have received over 35,000 requests for devices and over 200,000 visitors to our website.
- Of the 35k registered, more than 80% are living in families of 3+ with household incomes of $35,000/yr or less.

HOW YOU CAN HELP
- Hardware donations from individuals and corporations - laptops, desktops, and monitors 5yrs old or less.*
- Financial Contributions support the project and help us purchase power-cords and other needed equipment.
- Share this work or connect us with your network.

*Note: all devices are wiped to a DoD standard.

THIS IS A PROBLEM WE CAN SOLVE TOGETHER
