This report contains cumulative data from laboratory-confirmed results of nucleic acid amplification tests (NAAT) and antigen tests from March 21, 2020, to present time. At home tests are not included in this data, so information and graphs demonstrate trends rather than a full accounting of cases. Numbers in parenthesis show the change in the number of tests from the previous week.

Test positivity is calculated as a rolling 7-day test positivity by specimen collection date; all positive molecular (PCR/NAAT) test results are divided by all molecular (PCR/NAAT) test results (positive and negative) for the last 7 days and multiplied by 100 to reach a percentage. This does not include laboratory confirmed antigen tests.

For this reporting week, NAAT percent positivity for Central Connecticut Health District (11.8%), Hartford County (8.7%), and the state of Connecticut (9.4%) can be found in Table 1 along with NAAT percent positivity for previous weeks. Additional results for Berlin, Newington, Rocky Hill and Wethersfield are shown in Table 2.

Data for the Weekly COVID-19 Positivity Report is collected every Monday. This is the second COVID-19 Weekly Report for CCHD. The data for this report was collected on September 26, 2022, from [https://data.ct.gov](https://data.ct.gov).

Berlin (population 20,436)
- A cumulative number of 77,984 (+213) have been administered to Berlin residents.
- Of the tests administered 4,449 (+61) were laboratory positive.
- NAAT rolling 7-day test positivity was 10.7%.
- No additional deaths were recorded this week. The loss of Berlin residents remains at 53.

Newington (population 30,014)
- A cumulative number of 134,352 (+376) have been administered to Newington residents.
- Of the tests administered, 7,373 (+43) were laboratory positive.
- NAAT rolling 7-day test positivity was 8.7%.
- No additional deaths were recorded this week. The loss of Newington residents remains at 139.

Rocky Hill (population 20,115)
- A cumulative number of 92,806 (+255) have been administered to Rocky Hill residents.
- Of the tests administered, 4,621 (+111) were laboratory positive.
- NAAT rolling 7-day test positivity was 21.0%.
- No additional deaths were recorded this week. The loss of Rocky Hill residents remains at 153.

Wethersfield (population 26,008)
- A cumulative number of 111,884 (+298) tests have been administered to Wethersfield residents.
- Of the tests administered, 6,492 (+24) were laboratory positive.
- NAAT rolling 7-day positivity was 6.6%.
- No additional deaths were recorded this week. The loss of Wethersfield residents remains at 58.
