Kaatsbaan Summer Festival 2020
Safety Guidelines

General Rules
Following Phase 4 guidelines for “Outdoor Arts and Entertainment Low Risk Activity”
For the Mid-Hudson Valley Region

Performances will be a maximum of 30 minutes long, with an estimated overall event time of one hour to include arrival and departure times, as well as viewing of the art and film installations on the grounds.

Performances will include solos and duets, for individuals who have quarantined together, as well as socially distant trios. All artists will be following approved protocols.

Face coverings will be required for entry.

There will be no in-person transactions, all registered attendees will receive an email prior to attendance that will include Festival FAQs and other instructions, including arrival times, as well as program information.

Staff and volunteers must wear masks and have health assessment and temperature check before working.

Social distancing signs and pathways will be clearly marked to remind patrons to maintain at least 6 ft. social distance on the premises. Staff/Volunteers will assist with enforcing social distancing and escorting and directing patrons to their seats while maintaining distancing.

A regular cleaning and sanitizing schedule of the grounds will be maintained by Kaatsbaan staff, including stage and all interior buildings used by staff, artists, and patrons.

There will NOT be bathroom access during the Festival, except for emergencies. Professional staff will monitor, wipe, and sanitize between each use. Only one person at a time in bathroom. HAND SANITIZER AND SOAP will be provided.

Kaatsbaan Cultural Park relies on the efforts of its patrons to follow these safety guidelines as well as to use any additional techniques they may believe assist in the prevention and spread of COVID-19 (Coronavirus). Patrons acknowledge that adherence to these guidelines may not ensure protection against the contraction or spread of COVID-19. Kaatsbaan encourages its patrons to monitor publicly available information and always to follow federal, state and local health organization guidance and government mandates. Furthermore, these guidelines should not be interpreted as setting a standard of care, or be deemed inclusive of all proper methods of care nor as exclusive of other methods of care reasonably directed to obtaining the same results. These guidelines reflect Kaatsbaan’s understanding of the available data at the time the guidelines were prepared. The results of future studies may require revisions to these guidelines.
