

## Selection Criteria for 2021-2022 Grant Competition - Performance Scoring Examples

	Points	Formula	Example:
1 Enrollment Rate for most recently completed program years (up to 3 years)  <i>Number of AmeriCorps members enrolled in awarded, plus refill slots, divided by number of awarded slots.</i>	15	(enrollment rate)*15	(25/25)*15 = 15
2 Retention Rate for most recently completed program years (up to 3 years)  <i>Number of AmeriCorps members exited with education award divided by number of AmeriCorps members enrolled.</i>	15	(retention rate)*15	(22/25)*15 = 13.2
3 30-day exit compliance (up to 3 years)  <i>Number of AmeriCorps member exits in compliance with exit deadline divided by total number of exits</i>	10	(exits in compliance / total exits - see left) *10	(23/25)*10 = 9.20
4 Performance Measures Met/Unmet  <i>Sum of percents of performance measure targets achieved divided by the sum of percents of performance measure targets possible.</i>	25	(sum of percents of performance measure targets achieved / sum of percents of performance measure targets possible) *25	(2025.43/2400)*25 = 21.098229...  This example program had three years of performance measure data, each year with 8 performance measure targets: (8*3*100=2400)
5 Reporting Requirements Met  <i>a. Progress reports (a / x)</i>  <i>b. Financial status reports (b / y)</i>  <i>Number of reports submitted on time / number of reports due (a+b)/(x+y)</i>	10	(number of reports submitted on time / number of reports due)*10	(8/8)*10 = 10

	Example
Total points received	68.498229
Total points possible	75
Percentage of Total points possible	91.33%

**Other Criteria to be considered:**

- 1 Youth Corps: If two applicants are approximately equal, then the youth corps program would be given priority.
- 2 Compliance issues: May affect program ranking if issues are serious and/or unresolved.
- 3 Applicants must meet minimum performance score of 80% of total points in order to be considered for Formula funding, unless the Board decides to waive the 80% requirement based on evidence of a corrective action plan to include benchmarks and associated milestones. Reaching the 80% minimum is inclusive of rounding to two places after the decimal point. An exception to the 80% minimum shall apply for the first three years of a new project. See Formula Funding Process.
