Cloud Catcher

MANIFESTO

1. We humans are intuitive, emotional, social and embodied animals.
2. We make sense of the world through our feelings. Through our hearts and minds combined. Through story, music and metaphor. Through our relationships with others and the wider world. And through action.
3. We are not simply machines, computers, rational decision-makers.
4. We are nature; indivisible from the rest of life. The wellbeing of all humans and all species is interconnected.
5. We belong here, in community with everything and everyone else. We find wholeness through reciprocity and connection.
6. The state of the world, then, is not something to turn from but to lean into, eyes and hearts open.
7. If we are to survive, let alone thrive, we must find our way back. Back to our true nature. Back to the potential we carry sleeping in our bones. Back to our beautiful reliance on each other. Back home.

WE WANT

A fair and flourishing future.

WE WILL

- We will bring our whole, brilliant and perfectly imperfect selves to everything we do, with confidence and humility.
- We will treat the challenges we tackle as systemic - letting equity, inclusion and sustainability guide our hearts and our hands at every turn.
- We will help others doing good work in the world to do the same.
