

LET'S GET STARTED!

Before we get started on demolition, here are a few things you should consider before we start your project.

Please note that some of these items may not apply to your project.

ARE YOU READY FOR DEMO?

- Pictures/Art** - Remove anything that can fall off the walls.
- Clear a Path** - Clear paths to the main water shut-off, electrical panel, and main gas shut-off.
- Furniture** - Push furniture away from the main walk ways. We will cover them in painters plastic. We do not move your furniture, unless noted in the contract, for liability reasons.
- Refrigerator** - Empty fridge contents into a cooler the morning of the demo, and decide where you want to move it so we can re-plug it in if necessary.
- Last Chance** - Clearly label all items that you want us to save/salvage.

THINGS YOU SHOULD KNOW.

- Crew's Schedule** - Our crew may not be there first thing in the morning. Your project might be their second job of the day or they might have to stop for materials in the mornings.
- Interruptions** - If you work from home, expect interruptions (electrical power, construction noise, water shut off, etc).
- Appliance Delivery** - Appliances need to be delivered to the same floor as your project is on. We are not responsible for moving appliances or any damages.
- Furnace/Air Conditioner** - You should purchase a few extra filters to swap out weekly during the demo to remove the extra dust.
- Water** - When changing pipes, sediment can often come loose. You will want to run water for a bit before immediate use. You may also notice rusty water (mostly older homes).

LET US KNOW.

- Security** - What is your preferred method of entry for our crew? Is there a garage code or an alarm? Where is the best place we could put a lock box?
- Bathroom** - Which bathroom can our workers use? OR should we order a portable toilet?
- Pets** - Do we need to be concerned about them escaping? Where will they be kept?
- Neighbors** - Do you have any concerns about your neighbors?
- Materials Storage** - Where can we store our materials? Garage? Basement? Other location?
- Dumpster** - What is your location preference, if you're facing the garage?
