Our Vision
A future in which New York Harbor is the center of a rich, diverse, and abundant estuary. The communities that surround this complex ecosystem have helped construct it, and in return, benefit from it, with endless opportunities for work, education, and recreation. The Harbor is a world-class public space, well used and well cared for—our Commons.

Our Ethos
Restoration through Education
We believe that restoration without education is fleeting. To ensure the long-term health and productivity of our natural environment, we must teach young people to care for, monitor, and restore their harbor.

Education through Restoration
We believe that students learn best when applying their studies to large-scale ecosystem restoration projects that challenge them to become active participants and take them out of the classroom, down to the water’s edge to experience the ecosystem first-hand.

Our Flagship School
The Urban Assembly New York Harbor School’s mission is to provide a college-preparatory education built upon New York City’s maritime experience that instills in students the ethics of environmental stewardship and the skills associated with careers on the water. New York Harbor School offers career and technical education (CTE) programs in 7 areas of marine science, technology, policy, and engineering.
