Mid Continent Meeting Cocktail Party

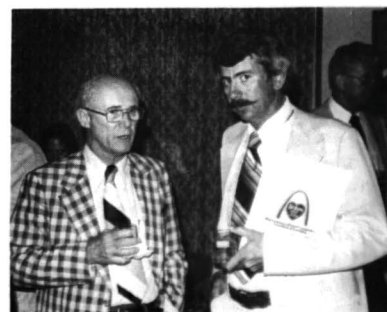

A large group of alumni, their spouses, and other friends of the School of Dental Medicine attended a reunion cocktail party at the Chase-Park Plaza Hotel in St. Louis on September 11 during the Mid-Continent Dental Meeting. Among those present were: (left to right) Drs. Jules M. Snitzer '55, Harry Bozoian, and J. Richard Landgraf.

Smiling prettily for the photographer at the cocktail party were: (left to right) Mrs. Fred Fabric, Dr. Fabric, and Mrs. Robert E. Bedell. If you thought you noticed a slight resemblance, you're right—the two ladies are sisters. Dr. Fabric was among a number of dentists who, though alumni of other schools, were honored guests at the cocktail party for their interest in and support of the WU School of Dental Medicine.

While on her way to the alumni cocktail party at the Chase-Park Plaza Hotel, Dr. Shirley Pierce (right) '61, Chairperson of the School's Department of Community & Preventive Dentistry, encountered TV star Flip Wilson, a guest at the hotel while shooting some TV footage in St. Louis. Flip autographed a baseball Cardinal batting helmet as a gift for Dr. Pierce. Among those looking on is Dr. William Stocker '46 (center).

Dr. Joseph H. Laffler '61 (right) has a wary look as he contemplates the schedule that he carries for the Mid-Continent Dental Meeting. He is chatting with Dr. William S. Brandhorst '43, current president of the Dental Society of Greater St. Louis, which sponsors the big fall dental meeting in St. Louis.

Three old friends, all distinguished alumni of our School and retired members of its faculty, get together for a few words at the September 11 cocktail party—(left to right) Drs. Philip G. Vierheller '29, Robert E. Bedell '44, and Earl E. Shepard '31.

In thoughtful conversation at the September 11 cocktail party were Dr. Kenneth Marshall '40 (left) and Dr. Theodore Behrens '23.

Dr. Hiroyuki Arima '77 is shown chatting with friends at the cocktail party during the Mid-Continent Dental Meeting. The young lady at right could not be identified.

Waiting eagerly (and flashing their most seductive smiles) for new recruits to the Century Club and Leroy R. Boling Associates were (left to right): Dr. John E. Gilster '44, Dental Alumni Association Editor and national chairman of alumni annual giving for the entire university, Dr. Leo S. Shanley '55, who has just stepped down as chairman of the Boling Associates, Miss Ilene Pearl of the WU alumni relations office, Dr. Joseph H. Laffler '61, Century Club chairman, and Dean George D. Selfridge.

Dean's Message

As I write this, a mid-September heat wave finally has abated and St. Louis is enjoying the cool nights and warm sunny afternoons that make early autumn such a delight in the Mid West. The tang of fall is in the air, the revitalized Missouri Tigers are preparing to take on the awesome Sooners of Oklahoma, and the Class of 1982 is hard at work trying to solve the mysteries of immunology, biochemistry, dental morphology, and all the other subjects of first year dental study.

We welcomed our 113th graduating class to the School at the end of August with a 2-1/2 day orientation program and then, right after the Labor Day weekend, the new students plunged into their work. They're a fine-looking group: 85 bright, attractive young men and women, and we expect very good things from them.

On September 24, our new students and their families were guests of honor at the annual picnic sponsored by the Faculty Wives Organization. This is

always a delightful event with bountiful food and spirited volleyball and softball games and we are most grateful to Anna Mae Ballard, president of the faculty wives' group, Judy Barnes, picnic chairperson, and all the members of the organization for all the hard work that produced another successful and much appreciated picnic.

Speaking of our students, I have seldom seen our senior students so enthusiastic as they were after our Big Brother reception on September 6. Our new Big Brother program, chaired by Dr. W. Neal Newton, pairs senior students desiring to participate in the program with alumni in the St. Louis area. The aim is to develop a warm personal relationship between the two and also to give the dentist-to-be a first-hand look at the operation and management of a private dental practice. Participating in the new program are 76 senior students, well over 90% of the class, and an equal number of dedicated alumni.

The Big Brothers and Sisters and the students assigned to them were brought

together at a wine-and-cheese reception on September 6 and, as I have mentioned, there was a fine reaction from all concerned. Several students sought me out afterwards to thank the School for setting up this new program (really, it is our alumni who deserve the credit) and to say how much they are looking forward to it. We hope this Big Brother program will be creating such enthusiasm for many years to come.

In my last message, I mentioned our plans for the renovation and enlarging of the senior lab on the first floor of our Carlyn H. Wohl Research Building. Bids for that work have been accepted and submitted to the WU Board of Trustees for final approval. Construction is scheduled to begin around October 1 and the project should take about nine months. Meanwhile, our new audio-visual production studio has been completed on the third floor. The spacious new A/V facility gives us first-rate quarters for still and film photography and TV taping for

Continued on next page

production of self-instruction materials, as well as a new darkroom and an office for our illustrator. Plans for our eventual expansion into the old A&P bakery east of the School are still being developed by our architects. Modification of our business office, just off our ground floor patient waiting room, also is in the works.

Our Department of Community & Preventive Dentistry, under Dr. Shirley Pierce, has begun a four-month pilot program to provide free dental care for the children of migrant workers in the Bootheel area of southeast Missouri. A vehicle on loan from the State of Montana travels to various schools to provide the dental treatment, which is paid for by the migrant worker center at Southeast Missouri University.

Meanwhile, Dr. Pierce's department is operating two more remote units in outstate Missouri. One alternates each year between southeast and southwest Missouri and this year is stationed at the regional center for the developmentally disabled in Springfield. Volunteer dentists of the Springfield Dental Society help man that unit. The other mobile unit will be spending October in Nevada, Mo. after a very productive month in the Osage Beach area. These latter two units are funded by the Missouri Elks Clubs.

The students and energetic young faculty members of Community & Preventive also continue their valuable services at the juvenile detention center and Herbert Hoover Boys Club in St. Louis.

We're delighted that several of our alumni have become members of our full-time faculty: Dr. Gordon Thompson '52, Operative Dentistry; Dr. Groves Cook '71, Endodontics; Dr. Michael Italiano, '78, Community & Preventive; Dr. Earl Sandroff '78, Removable and Fixed Prosthodontics; Dr. Robert Rizzuti '78, Oral Diagnosis & Radiology. An addition to our full-time periodontic faculty is Dr. Yusuf K. Eratalay, a native of Turkey, and formerly a post-doctoral student in our Department of Oral Pathology. We heartily welcome these new full-time faculty members along with the several new part-time members of the faculty.

A large and convivial gathering was present at our reunion cocktail party during the Mid-Continent Dental Meeting in St. Louis and we look forward to more such pleasant encounters with alumni and friends of the School and their spouses at our social events at the ADA annual session, the New York dental meeting, and the Chicago Mid-Winter Meeting. I hope to be seeing you!

George D. Selfridge
Dean

Third Level student Doxey Ransom was chosen as "Student of the Quarter" for the last quarter of the 1977-1978 academic year. The selection was made by Dean Selfridge with the aid of faculty recommendations. Ms. Ransom, from California, once swam on national championship relay teams. She is the mother of two children.

Undergraduate Students Also Benefit from our Graduate Programs

The School of Dental Medicine is fortunate to have four approved graduate training programs in the specialty areas of Orthodontics, Oral Pathology, Oral-Maxillofacial Surgery and Endodontics. The presence of these programs add significantly to the depth of the educational experience of the undergraduate dental student.

The recently formed Craniofacial Anomalies Institute along with the Cleft Palate Institute and their affiliation with the School of Dental Medicine provide much needed treatment to patients with these deformities. The experience derived by the dental student when exposed to these special areas brings together a multiplicity of services including Pedodontics, Maxillofacial Prosthetics, Orthodontics, Oral-Maxillofacial Surgery, Plastic Surgery, Pediatrics, Speech Pathology and Otorhinolaryngology. During rotations on the hospital service, dental students have their views expanded regarding the role of the dentist in the hospital environment.

Radiation Oncology is a very active service at Barnes Hospital and a close relationship exists among Radiation Therapy, Oral-Maxillofacial Surgery and Oral Pathology. Joint communication among Plastic Surgery, Otolaryngology, Radiation Oncology, Oral Pathology and Oral-Maxillofacial

Surgery preempt definitive treatment protocol. Head and Neck Tumor Morbidity Conferences are held weekly and are attended by rotating dental students. Here, valuable experience is gained in the management of pre- and post-radiation patients, as well as insight as to the complications that can develop after radiation therapy.

Maxillofacial Prosthetics plays an important role in the final rehabilitation of the post-surgical head and neck cancer patient. Complex cases are reviewed and an extension of the student's knowledge of prosthodontics is made to the ultimate care of these patients.

During the past three years, the second and third level dental students have been granted the opportunity to participate in a hospital oriented clinical rotation. During the rotation, the students are exposed to all aspects of hospital protocol including admission procedures, management of hospitalized patients and record keeping. The dental student is provided the experience of visiting the operating room and learning surgical scrub and sterile technique. In addition, participating in the outpatient Oral Surgery Clinic, under the supervision of the oral surgery resident broadens the exposure to a variety of pathology and minor oral surgical techniques.

The Hospital Clinical Rotation is generally well-received and appreciated by the students. Plans for expansion of the program are being considered since the need for expanded dental care of the hospitalized patient exists; and adequately trained dentists are required to provide this service. Although these rotations do not provide all the necessary training, it is hoped that the experience will engender a desire in the student to pursue an advanced training program in one of the dental specialties.

Alumni Meeting March 16-17, 1979

Outstanding clinical presentations by guest clinicians and members of the Washington University faculty will highlight the 113th annual meeting of the Dental Alumni Association. The meeting will be held in St. Louis on Friday and Saturday, March 16 and 17, 1979. Headquarters hotel for the annual meeting again will be the plush Breckenridge Inn in St. Louis County, scene of the last two annual meetings, which has received almost unanimous approval from alumni for its comfortable accommodations and excellent food.

All the traditional features of the annual meeting are included on the schedule for the March session, along with a renewed emphasis on clinical programs. Special tribute will be paid during the meeting to the reunion classes of 1929, 1954, and 1969—the 50, 25, and 10 year classes.

As in recent years, an outstanding Continuing Education course will be offered at the School of Dental Medicine on Thursday, March 15, as an optional preamble to the alumni meeting. Many alumni have taken advantage of the opportunity to come to St. Louis a day early and obtain continuing education credits in addition to attending the alumni sessions.

The course on March 15 is titled "Oral Medicine and Clinical Pharmacology" and will be given jointly by Dr. William K. Bottomley, Chairman of the Department of Oral Diagnosis, Georgetown University School of Dentistry, and Dr. Sam V. Holroyd, a Captain in the U.S. Navy Dental Corps and currently head of the Educational Programs Development Department of the Naval Health Sciences Education & Training Command. Tuition for the full-day course will be \$90, which includes luncheon. A printed leaflet describing the course in detail will be available around December 1. Anyone interested in obtaining such a leaflet can write at that time to the Department of Continuing Education, Washington University School of Dental Medicine, 4559 Scott Ave., St. Louis, MO 63110.

Drs. Bottomley and Holroyd will be the featured clinicians during the alumni meeting also and each will give a presentation that will be separate and distinct from their joint course on Thursday. On Friday, March 16, Dr. Holroyd will present the morning program on "Local Anesthetics & Vasoconstrictors (Drugs, Problems & Solutions)" and "Special Topics: Treatment of Acute Necrotizing

Ulcerative Gingivitis & Prophylaxis Against Subacute Bacterial Endocarditis."

The Friday luncheon will include the annual business meeting of the Dental Alumni Association and the annual report on the School by Dean Selfridge.

Friday afternoon will offer a double option: three short courses to be offered by faculty members of the School of Dental Medicine and the annual open house and tour of the School. Chartered buses will be available to bring alumni to the School for the courses or the tour. The short courses, each lasting from about 1:30 to 5 P.M., will be presented by Dr. Hugh Berry, Chairperson of the Department of Endodontics, Dr. Mohamed Marzouk, Chairperson of the Department of Operative Dentistry, and Dr. Warren H. Speiser, Visiting Lecturer in Removable Prosthodontics. A fee of \$20 will be charged for each short course and enrollment in each course will be limited to 15 alumni. Registration forms for the annual meeting, including the short courses, will be mailed to all alumni early in 1979.

The traditional banquet of the alumni meeting will be held on Friday night at the Breckenridge. The banquet program will be highlighted by the tribute to the special reunion classes and the installation of the 1979 officers of the Alumni Association. Music for dancing will be provided after the program.

The traditional Past Presidents breakfast will open the Saturday morning, March 17, schedule while other alumni will gather for an eye-opener coffee. The morning clinical presentation will feature Dr. Bottomley speaking on "Treatment of Common Oral Lesions." Being planned for Saturday at Noon is a luncheon

Dean George D. Selfridge listens intently to discussion during the September 9 meeting of the Dental Alumni Association board of directors in St. Louis. The Association board holds two meetings a year, the second one coming during the Association's annual meeting in March.

honoring the alumni participating in the School's new "Big Brother Program" and their assigned senior students who will attend the luncheon as guests of their Big Brothers. All other alumni, of course, will be invited to attend the luncheon.

"We have had comments from some alumni indicating that the annual meeting should provide more intensive clinical offerings," Dr. Neal noted, "and we have endeavored to meet those requests in planning our next meeting. With the fine help of Dean Selfridge, we have secured two nationally-respected clinicians in Drs. Bottomley and Holroyd and are delighted that they will each present an excellent program during our meeting, in addition to their jointly-given course at the School on March 15. In addition, the three short courses to be offered at the School on the afternoon of March 16 will give this alumni meeting a clinical depth of interest that should have wide appeal to our alumni. We are looking forward to one of the best, and best-attended, annual meetings in many years."

Among those attending the September 9 meeting of the Dental Alumni Association board of directors in St. Louis were: (facing camera, left to right) Dr. John W. Hatley '63, Mr. Stuart Russell, Miss Ilene Pearl of the WU alumni relations staff, Dr. Robert E. Bedell '44, immediate past president of the association; Dr. John R. Neal '45, president; and Dr. Dan P. O'Brien '64, president-elect. Mr. Russell of Kirkland Travel of Kansas City was on hand to discuss a possible special tour program for WU dental alumni.

Big Brother Program

Dr. W. Neal Newton '51 welcomes alumni and students to a reception for participants in the School's new Big Brother Program. Dr. Newton is chairman of the program, sponsored by the Dental Alumni Association in conjunction with the School. The reception, held September 6 at Ellenwood Alumni House on the university's main campus, was attended by over 100 students and alumni.

A long-awaited alumni advisory program that has become known as the "Big Brother Program" is getting started at the School. Under the program, an alumnus or alumna of the School will spend the year as an advisor and friend to the member of the Third Level class assigned to him or her. It is hoped that the student will thus be enabled to periodically visit the office of his or her Big Brother in order to get more exposure to the mechanics of conducting a private dental practice. The alumni also will be encouraged to get together periodically with their students on a social basis and perhaps to attend dental meetings and other programs together.

Having a relaxed conversation in a corner of the big living room at Ellenwood Alumni House with Third Level student Bob Keating (left) and Dr. James L. Amos '54, his Big Brother in the new program in which senior students will become familiar with the approach of an alumnus engaged in private dental practice.

The operation of the Big Brother Program has been planned by a committee of alumni chaired by Dr. W. Neal Newton. That committee also is recruiting alumni to take part in the program and has assigned interested students to alumni who have signed up. Additional alumni are being invited to take part and it is hoped that every student will have a Big Brother assigned. On September 6 an informal wine-and-cheese party was held on the main campus to introduce the students to their Big Brothers or Sisters.

Third Level student Bob Martinich (left) gets acquainted with Dr. Alvin H. Faber '50, to whom he has been assigned in the new Big Brother Program.

Another member of the School's senior class, Miss Jeanne Needham, talks with the Big Brother assigned to her in the new program, Dr. Otto C. R. Hanser, Jr. '35.

Dean Selfridge Honored

Dean George D. Selfridge has been selected as the "Alumni Man of the Year" by the Dental Alumni Association of the State University of New York at Buffalo. He was presented with the prestigious award on September 30 during a dinner dance highlighting the Greater Niagara Frontier Dental Meeting sponsored by the Dental Alumni Association of SUNY at Buffalo. The dental meeting was attended by several hundred alumni of the Buffalo dental school along with many other dentists from Western New York and Canada.

Dr. Selfridge was honored by his fellow alumni for his outstanding career as a practitioner and administrator in the Navy Dental Corps, his imaginative and vigorous leadership as Dean of our School, and his service to the dental profession through his work in organizations such as the International College of Dentists, of which he is now Vice-President.

Dr. Selfridge received his dental degree in 1947 from what was then the University of Buffalo Dental School. He attended dental school under Navy auspices and then entered the Navy Dental Corps for what was to be a career of more than 28 years. He retired from active duty two years ago with the rank of Rear Admiral after serving as commanding officer of the National Naval Dental Center to accept the position of Dean here.

Discussing plans to get together as part of the Big Brother Program were: (left to right) Third Level student Michael Shanias, Dr. Adele Reby '47, Dr. Jacob Reby '43, Dr. Robert Saunders '77 and his wife, Third Level student Yona Saunders. Shanias is assigned to Dr. Jacob Reby and Mrs. Saunders to Dr. Adele Reby in the Big Brother Program.

Class of '78 Honors and Awards

A happy family group is shown during the Senior Awards Night and Reception: (left to right) Miss Mary Brennan, Mrs. J. Richard Landgraf, Dr. John R. Landgraf of the Class of 1978, and his father, Dr. J. Richard Landgraf. Miss Brennan is John Landgraf's fiancée.

On June 21, degrees were formally conferred upon the Class of 1978 and its members are now officially alumni of the School of Dental Medicine.

At the Senior Awards Night program on June 20, the following students were the recipients of awards and honors. JOHN S. BOND—XI Psi Phi Scholarship Award, XI Psi Phi Anatomy Prize, Edgar S. Hill Memorial Award, Academy of General Dentistry Award, American Academy of Oral Medicine Award, American Academy of Dental Radiology Certificate, Alpha Omega Award, Washington University Dental Alumni Association Prize, C.V. Mosby Award in Orthodontics, elected to OKU, graduated with Honors; MARIANNE R. SPAMER—Anna Bredall Award, American Academy of Periodontology Award, Delta Sigma Delta Award, Otto Brandhorst Leadership Award, elected to OKU; KENNETH R. WEHRENBURG—American Association of Orthodontists Award; F. MICHAEL FROMM—American Association of Endodontists Award; MARK E. DIEHL—Delta Sigma Delta Scholarship Award, elected to OKU, graduated with Honors; KEVIN D. PINE—Dentsply International Merit Award; WILLIAM A. KING—International College of Dentists Award; ROBERT C. SCHELLENTRAGER—American Academy of Gold Foil Operators Certificate; HANNA E. BRESLER—Alpha Omega Certificate Award, elected to OKU; DENNIS A. PARROTT—American Society of Dentistry for Children Award; LESLIE E. LATNER—American Society of Dentistry for Children Award; STEVEN W. THOMPSON—Richard Bengel Acknowledgement Award for

Dr. Samuel E. Guyer (right), Chairman of the Department of Fixed Prosthodontics, presents the Richard Bengel Acknowledgement Award for Excellence in Crown and Bridge to Dr. Steven Thompson during the Senior Awards Night program.

Dr. Lorin Peterson (left) is the proud recipient of the American Academy of Oral Pathology Award from Dr. Peter Pullon, Chairman of the Department of Oral Pathology at the School of Dental Medicine.

Excellence in Crown & Bridge, C.V. Mosby Award in Prosthodontics; TSUN M A—Richard Bengel Acknowledgement Award for Excellence in Periodontics, J.D. White Award in Fixed Prosthodontics; LORIN D. PETERSON—American Academy of Oral Pathology Award, American College of Stomatologic Surgeons Award; SIMS W. LOWRY—American Dental Society of Anesthesiology Award, Edward R. Hart Award in restorative dentistry; NELSON D. LASITER—Anna Bredall Award, C.V. Mosby Award in Oral Pathology, elected to OKU, graduated with Honors; TED M. ROSNER—C.V. Mosby Award in Oral Surgery; JAMES P. MCCARTHY—C.V. Mosby Award in Pedodontics; JAMES MICHAEL STARTZELL—elected to OKU, graduated with Honors; to BRUCE J. TANDY—elected to OKU; WALTER E. ZABRISKIE—elected to OKU.

The new members of Omicron Kappa Upsilon, the national dental honor society, were honored at a banquet June 19th at Whittemore House. In addition to the students mentioned above, faculty members initiated into OKU were Drs. John J. Delfino, Stephen Hall, Marzban Patel, and Monika Strong, and Dr. Memory P. Elvin-Lewis was made an honorary member. Dr. William E. Koch, Jr. was awarded life membership in the WU chapter of OKU. Dean Selfridge saluted the new OKU members for their achievements before an audience of more than 80 persons.

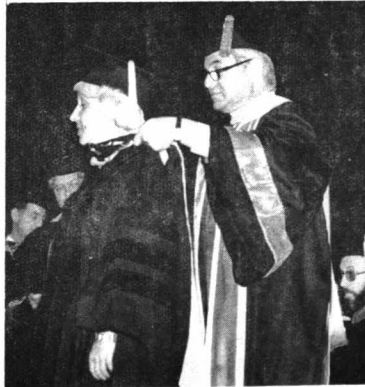

A plaque signifying the Dentsply International Merit Award for distinction in the study of Removable Prosthodontics is presented to Dr. Kevin Pine (left) of the Class of 1978 by Dr. James W. Carson, Chairman of the School's Department of Removable Prosthodontics.

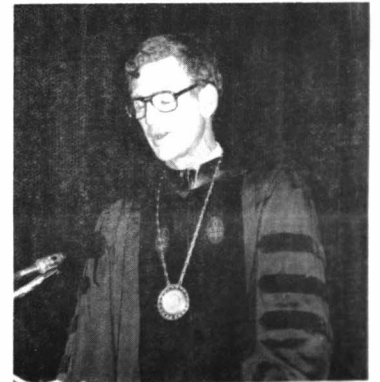

Members of the Class of 1978 who received awards and honors are shown here as they gathered at the Senior Awards Night & Reception. The program sponsored by the Dental Alumni Association and the School, was held on June 20, the night before Graduation, at the Breckenridge Inn in St. Louis County. Those honored included: (Front row, left to right) Drs. Marianne Spamer, Leslie Latner, Lorin Peterson, Sims Lowry, John Bond, TsuN Ma, Steven Thompson, Wlater Zabriskie, Kenneth Wehrenberg, and Hanna Bresler. (Back row, left to right) Drs. Kevin Pine, James McCarthy, Bruce Tandy, John Landgraf, Mark Diehl, William King, F. Michael Fromm, Ted Rosner, Robert Schellentrager, Nelson Lasiter, Dennis Parrott, and James Michael Startzell.

Featured speaker at the School's graduation ceremonies on June 21 was Dr. Gerald T. Perkoff, Director of the Division of Health Care Research at the Washington University School of Medicine.

As each member of the 1978 graduating class was called to the stage in The Edison Theatre, an academic hood signifying acquisition of the degree of Doctor of Dental Medicine was placed on her or him. Here, Dr. Jennifer Hershey is hooded by Dr. David A. Bensinger, Associate Dean, who served as Grand Marshal for the graduation activities.

Chancellor William H. Danforth of Washington University is shown as he welcomed the honored guests and the audience to graduation ceremonies of the School of Dental Medicine on June 21. The program was held in The Edison Theatre in the Mallinckrodt Center on the main campus of Washington University.

Dr. James Michael Startzell, President of the graduating class, is shown as he asked his classmates to join him in applauding the assembled parents, spouses, and children of the new dentists as an expression of thanks for their support and help during the three difficult years of dental school.

Alumni Annual Giving

We have just completed a record-setting year of giving to the dental school. Almost 36% of our Alumni, second only to the School of Medicine, donated to the dental school during the last fiscal year (1977-1978). For the first time in recent years, we would like here to recognize the generous Alumni. They are identified in connection with the Giving Club which they have joined: the Eliot Society (\$1000—and above—gift per year), the Boling Associates (\$250—up to \$999—per year) and the Century Club (\$100—up to \$249—per year). Eliot Society members are also considered members of the Boling Associates and the Century Club; and Boling Associates are considered members of the Century Club. To save repetition, the Eliot Society and Boling Associates will be listed only with their respective clubs. Earl Shepard heads the Eliot Society; Jeff Schroeder chairs the Boling Associates and Joe Laffler, the Century Club.

Dr. Foerster Dies

Dr. Frank H. Foerster, class of 1912, passed away on August 11 at the age of 90. Professor Emeritus of Clinical Prosthetics, Dr. Foerster retired in 1947 after teaching for thirty five years although he continued his private practice of dentistry in South St. Louis for ten more years. He served on the staff of Lutheran Hospital for many years and was on the Selective Service Board during World War II.

Dr. Foerster was a member of Omicron Kappa Upsilon honorary fraternity and a Fellow of the American College of Dentists. He was also the recipient of Washington University's Distinguished Faculty Award at the Founders Day Ceremony in 1959.

A teacher who inspired great respect and deep affection, he served his Alma Mater with devotion. And in appreciation for his long years of service to the teaching of fixed prosthodontics and for his generosity, the Junior-Senior Frank H. Foerster Laboratory was dedicated to him in 1962. By coincidence, the lab is now to be extensively enlarged this coming year.

Dr. Foerster at the time of his retirement

Faculty Notes

Dr. Memory Elvin-Lewis, Associate Professor of Microbiology, was elected secretary-treasurer of the newly formed Dental Microbiology Chairmen's Association at the group meeting in Houston . . . Dr. Altug Kazanoglu, Instructor in Clinical Removable Prosthodontics, has had two articles published in recent months.

The first, titled "Inserting A Surgical Obturator", was published in the October, 1977, issue of the *Journal of the Missouri Dental Association*. More recently, his article on "Tray Fabrication for Unusually Large

Maxillae" was published in the July issue of the *Journal of Prosthetic Dentistry*..

Congratulations also to Dr. Kazanoglu on his recent election as an Associate Member of the American College of Prosthodontists . . . Dr. Roger Adams, Assistant Professor of Oral Diagnosis and Radiology, is working with two medical colleagues from the Mallinckrodt Institute of Radiology, Drs. William A. Murphy and Louis A. Gilula, on the development of a large display on Magnification Radiography of the Temporomandibular Joint. The free-standing display, measuring 16 feet wide by 8 feet high, will be shown first at the meeting of the Radiography Society of North America in Chicago in late November and then will be sent on a one-year tour of medical and dental meetings by Pfizer, Inc. The display stems from a research study conducted by the three scientists on how the microfocuss x-ray machine developed by Pfizer can be used for an unprecedented examination of the temporomandibular joint. They modified the x-ray machine for use with a positioning device for which they have applied for a patent. That positioning device also will be the subject of a paper to be presented at the RSNA meeting in Chicago. The big display will have eight panels on the principles of microfocuss magnification, the positioning of the patient, a film screen and dosimetry study (work was done on this with the 3-M Company to reduce the radiation dose to the patient), two panels on the radiographic anatomy of the TM joint, arthrography and its application with the machine, and two panels of case reports.

Playing an important role in generating kphotographic materials for the display were Steve Amsden and Marcy Hartstein of the School's audiovisual department. Dr. Adams, Murphy, and Gilula have been invited by a California physician, Dr. Don Resnick, to contribute a chapter on TMJ radiography to his textbook on joint radiography, to be published in 1980 . . . Dr. Samuel E. Guyer, Chairperson of the Department of Fixed Prosthodontics, will present two papers at the Second International Prosthodontic Congress to be held in Las Vegas on October 19-21. The first paper is titled "An Intra-Oral Occlusal Adjustment Technique for Complete Dentures" and the second essay will be on "Pontic Design." All the essayists at the Congress were required to submit papers for publication prior to the meeting. They will be published in the

Journal of Prosthetic Dentistry. On October 8-10, Dr. Guyer attended the annual meeting of the Federation of Prosthodontic Organizations in Chicago. Dr. Guyer was president in 1975 of the Federation, which is composed of 20 prosthodontic organizations.

New Faculty Members

Here's an introduction to new members of the School's faculty:

Dr. Gordon Thompson, Associate Professor of Operative Dentistry, really needs no introduction, having served for a number of years as a part-time faculty member in the clinic while maintaining a busy private practice in Kirkwood. Dr. Thompson, a 1952 graduate of the School, resides with his family in Kirkwood.

Dr. Groves Cooke, Assistant Professor of Endodontics, received his D.D.S. from our School in 1971 and earned an M.S. degree from George Washington University in 1975. From 1971 until recently he was on active duty with the Army Dental Corps and served for two years in Thailand. Dr. Cooke resides with his wife and two children in Creve Coeur.

Dr. Uysuf K. Eratalay, Assistant Professor of Periodontics, also is not a newcomer to the School, having recently been a post-doctoral student in our Department of Oral Pathology. Dr. Eratalay received his D.D.S. degree in 1973 from Istanbul University in his native Turkey. He later did graduate work in Periodontology at the dental school of Hacettepe University in Turkey. Dr. Eratalay resides in South St. Louis with his wife and two children.

Dr. Michael Italiano, Clinical Assistant in the Department of Community & Preventive Dentistry, is assigned to the Department's mobile units that provide dental service to handicapped children in outstate Missouri under the sponsorship of the Benevolent Order of Elks. Dr. Italiano and his wife live in St. Louis.

Two members of the School's Class of '78, Drs. Earl Sandroff and Robert T. Rizzuti, also have joined the School's full-time faculty as Clinical Assistants in, respectively, the Departments of Removable and Fixed Prosthodontics and the Department of Oral Diagnosis and Radiology. Dr. Sandroff is a carefree bachelor and resides in Maryland Heights. Dr. Rizzuti, a recent bridegroom, lives with his wife in South County. Congratulations, Bob, on your marriage!

We also welcome the following new part-time members of the faculty: Dr.

Richard Emanuel, Clinical Assistant in Operative Dentistry; Dr. Frederick Gustave, Assistant Professor of Clinical Oral and Maxillofacial Surgery; Dr. Irene Ku, Clinical Assistant in Operative Dentistry; Dr. Harvey Lehrer, Assistant Professor of Endodontics; Dr. Maria Michaelides, Visiting Assistant Professor of Immunology; Dr. John R. Landgraf, Jr., Operative Dentistry; Dr. Robert Melton, Community & Preventive Dentistry; Dr. Ronald Schoolman, Operative Dentistry; Dr. James Short, Operative Dentistry; Dr. Michael Trager, Removable Prosthodontics.

Contribute Your Precious Metal Scrap

A new scrap gold collection program enabling WU dental alumni to contribute their precious metal scrap for the benefit of the School of Dental Medicine will soon be established. The program was suggested by members of the Alumni Advisory Committee to the Dean and plans for the operation of the program have been approved by that committee and the Board of Directors of the Dental Alumni Association.

Operated in conjunction with J.F. Jelenko and Company, the program will enable alumni who want to participate to send their scrap gold and other precious metal scrap to Jelenko in special envelopes provided by Jelenko. The scrap will be evaluated by Jelenko according to the current price on the London market and a check in the appropriate amount then will be sent to the School by Jelenko. A gift receipt will be sent by Jelenko to the alumnus for tax purposes and he also will receive a replacement container for future contributions of scrap gold.

Individual contributions of scrap gold will accrue toward membership in Dental School and University giving clubs (i.e. Century Club, Boling Associates, Eliot Society).

Similar scrap gold programs in conjunction with Jelenko are being successfully used as alumni fundraising projects by the dental schools of Northwestern University, Columbia University, the University of Maryland at Baltimore, and Fairleigh-Dickinson University, among others.

A letter outlining the operation of the new program and a container for mailing scrap to Jelenko will be sent to all alumni in the near future.

Continuing Education

The rapid expansion and improvement of the Continuing Education program at the School of Dental Medicine, begun two years ago by Dean Selfridge, has resulted in a burgeoning schedule of 22 courses during the 1978-1979 academic year. The intensified C.E. program has more than tripled its course offerings during the two year growth period.

Mailings about the courses are sent to almost 15,000 dentists in a nine-state region around St. Louis, and practitioners from throughout the midwest and southwest regularly attend the programs, along with occasional visitors from such distant areas as California, Florida, and Canada.

"With the ever-increasing importance of continuing education to the members of our profession as a means of maintaining and increasing proficiency," Dean Selfridge recently commented, "we are very proud of the role that our revitalized Continuing Education program is playing in meeting this vital educational need."

Continuing Education courses at the School are planned by Dean Selfridge and Dr. Richard M. Diemer, Assistant Dean for Educational Development. The courses are administered by Irving Litvag, Director of Special Projects. The courses are approved for continuing education credit by the Academy of General Dentistry and state licensing agencies.

Noted clinicians from throughout the nation and a wide diversity of topics are among the features of the 1978-1979 C.E. schedule. Anyone desiring more information on any of the courses listed below should write the Department of Continuing Education, Washington University School of Dental Medicine, 4559 Scott Ave., St. Louis, MO 63110. The schedule:

Friday, Nov. 3—"Dental Hygiene: Conceptual Strategies for Teaching Effective Home Care" Dr. (Ph.D.) and Mrs. Herschel D. Thornburg, University of Arizona (NOTE: this course will be given on the main campus of Washington University with the School of Dental Medicine as a co-sponsor. Inquiries should be addressed to Washington University Continuing Education, Campus Box 1099, St. Louis, MO 63130.)

Saturday, Nov. 4—"Options in Treating Periodontal Pockets" Dr. Sigurd P. Ramfjord, Professor of Periodontics, University of Michigan

Saturday, Nov. 11—"Update on Pain" Dr. Samuel Seltzer, Professor of Endodontics, Temple University

Saturday, Nov. 18—"Clinical Genetics for the General Practitioner" Dr. Gerald H. Prescott, Associate Professor of Medical Genetics, University of Oregon (WU Class of 1964)

Saturday, Dec. 2—"Caries Prevention in the Home, Office, and Community" Dr. Ernest Nesbrun, Professor of Oral Biology, University of California at San Francisco

Saturday and Sunday, Dec. 9 and 10—"Clinical Management of Temporomandibular Joint Dysfunction" Dr. Harold Gelb, private practitioner, New York City; Director, TMJ Clinic, New York Eye and Ear Infirmary

1979

Saturday, Feb. 3—"Everyday Uses of Dental Electrosurgery" Dr. William J. Kelly, Clinical Associate Professor of Restorative Dentistry, Southern Illinois University; Dr. Alphonse Peterson, Clinical Assistant Professor of Oral Diagnosis and Radiology, Washington University

Friday and Saturday, Feb. 23 and 24—"Clinical Endodontics" (participation course) Dr. Franklin S. Weine, Professor of Endodontics, Loyola University

Saturday, Mar. 3—"Patient Motivation for Dental Auxiliaries" Ms. Betsy Alden, Director of Auxiliary Education, Temple University

Saturday, Mar. 10—"Humanodontics—The Application of Behavioral Science Principles to Dental Practice" Dr. James E. Cassidy, Associate Dean, Tufts University

Thursday, Mar. 15—"Oral Medicine and Applied Pharmacology in Dental Practice" Dr. William K. Bottomley, Professor of Oral Diagnosis, Georgetown University; Dr. Sam V. Holroyd, Dental Corps, U.S. Navy (Note: This course just precedes the Alumni Meeting weekend)

Saturday, April 7—"What to do when the Standard Dental Radiograph is Not Enough—Specialized Radiography for the General Dentist and Dental Specialist" Dr. Roger J. Adams, Assistant Professor of Oral Diagnosis and Radiology, Washington University (WU Class of 1974); Dr. D. Lorne Catena, Associate Professor of Oral Diagnosis, Southern Illinois University

Saturday and Sunday, April 21 and 22—"Occlusion and Practice Management" Dr. Carl E. Rieder, Clinical Professor of Prosthodontics, University of Southern California

Saturday, April 28—"The Science and Practice of Nutrition in Dentistry" Dr. Abraham E. Nizel, Professor of Nutrition and Preventive Dentistry, Tufts University

Saturday, May 5—"The Clinical Application of Dental Materials" Dr. Wilmer B. Eames, Professor of Operative Dentistry, Emory University

Saturday, May 12—"Adult Orthodontics Techniques for the General Practitioner" Dr. William R. Proffit, Professor of Orthodontics, University of North Carolina

Saturday and Sunday, May 19 and 20—"Recent Advances in Operative Dentistry for the General Practitioner" Dr. Ronald E. Jordan, Professor of Restorative Dentistry, University of Western Ontario (Canada)

Saturday, May 26—"Oral Rehabilitation for the Edentulous Patient" Dr. Robert W. Elliott, Associate Professor of Prosthodontics, Georgetown University

Saturday, June 2—"The General Dentist and the Care of the Cancer Patient Receiving Radiation Therapy to the Head and Neck" Dr. Oscar N. Guerra, Director of Maxillo-facial Rehabilitation, Ellis Fischel State Cancer Hospital, Columbia, Mo.

Officers of the Alumni Association

President	John Neal, D.D.S.
President-Elect	Dan P. O'Brien, D.D.S.
Vice President	Leo S. Shanley, D.D.S.
Secretary-Treasurer	Donald G. Sheldon, D.M.D.
Editor	John E. Gilster, D.D.S.
Executive Secretary	Irving Litvag
Editorial Assistant	Jeanne Felsch

Alumni News

A South Carolina newspaper carried a photo of Air Force Capt. Michael Spielberg doing work on Ian, a bomb dog of the Air Force security police. The valuable animal was injured and had four broken teeth with exposed root canals, requiring emergency treatment from Dr. Spielberg. A member of the Class of 1977, Dr. Spielberg is stationed at Myrtle Beach AFB in South Carolina. He is the son of Dr. Jerome Spielberg, Chairperson of the Department of Oral Diagnosis and Radiology.

The August 7 issue of the *ADA News* carried a story and photo of Dr. Gary P. Klugman, Class of 1975, one of two Public Health Service dentists assigned to examine some 230 Americans who were returned to this country in a prisoner exchange program after serving time in Mexican prisons. Dr. Klugman and another dentist, who are assigned to the U.S. Bureau of Prisons, conducted the examinations in San Diego. They found, to their surprise, that most of the returned prisoners had healthy teeth. Dr. Klugman said that many of the prisoners, fearing dental problems in the dismal Mexican prisons, took special pains with their oral hygiene while they were behind bars.

The entire issue *Dental Management Magazine* (June) was on the theme of "Building the Successful Practice" and included a number of helpful articles on that subject for young dentists and dental students. There are photos and brief accounts of the practice situations of three recent graduates of our School: Dr. Daniel T. Sullivan of the Class of 1975, Dr. R. Gregory Layman, also a 1975 graduate, and Dr. James D. Crandall of the Class of 1972.

L. Donald Guess, '67, recently offered a course "Gameplan for Survival, Happiness and Financial Success" at the Lennox Hotel in St. Louis. Dr. Guess lectures widely on financial planning and is president of the Economic Association of Health Professionals . . . J. Marlin Hodgson '62, has joined the faculty of the University of Mississippi Medical Center as an Associate Professor of Community and Oral Health. He was formerly an Assistant Professor at Columbia University School of Dentistry . . . Robert J. McCune '60, has been appointed to serve as a Trustee of the American Fund for Dental Health . . . Alvin Schein, '52, has been elected President of the Vermont Board of Dental Examiners.

Ms. Ilene Pearl, Director of Development for the School, is flanked by two stalwart members of the Class of 1958, Ed Grimes, left, and Robert Robertson. Ilene, whose office is on the main campus, works with the dental school in all fundraising efforts and devotes much time to alumni affairs as well.

Plans for Dental Explorer Post

Our School hopes soon to establish a new Dental Explorer Post in conjunction with the Boy Scouts of America. The post would involve young men and women, aged 14 1/2 to 18, who are interested in a career in dentistry. Creation of a Dental Explorer Post would provide valuable experiences for these young people that hopefully would enable them to make career decisions based on personal knowledge and contact with the dental profession.

The post will hold two meetings a month — one a business meeting and the other devoted to some sort of activity related to dentistry. A committee of three or four people from the School will be needed and one of those people will serve as post advisor to coordinate activities. Other persons will be needed as resource persons. Dr. Richard Brand has agreed to serve as a temporary advisor until the committee is formed. Any men or women from the faculty, alumni or student body who are interested in working with this program are asked to contact Dr. Brand at 454-0361. People involved in dental assisting, dental hygiene, and dental laboratory technology also are being contacted about the program, since some of the youngsters who will participate might be interested in these areas of the profession. The first organizational meeting of the Dental Explorer Post will be held sometime in October, with the date, time and place to be announced later. Don't forget to volunteer for this very worthy project by contacting Dr. Brand.

Orientation for New Students

The Class of 1982—the new First Level class at 84 new dental students—arrived at the end of August for the annual period of orientation and registration. The new students are the cream of the crop—they were chosen with great care by the faculty and students of the Admissions Committee from a field of 3,300 applicants. The number of applicants represented a decline from the previous year's total of 3,700 in keeping with a national trend of a leveling-off of applications to professional schools. There still, however, was an awesome ratio of some 40 applicants for each available place in the entering class. This stiff competition guaranteed that each successful applicant for the class would have impressively high qualifications for dentistry.

Geographically the new class again is dominated by Californians, with that state having 36 representatives. The rest of the geographical breakdown (this is based on the class as it stood August 23) showed 12 students from Missouri, nine from New York State, five each from Illinois and New Mexico, three from Arizona, two each from Hawaii, Washington, and Kansas, and one representative of Utah, Minnesota, Florida, Wisconsin, New Jersey, Nevada, Hong Kong, and India. Ten of the new students are women.

Several of the class members bear familiar names—they are the brothers or sisters of present students at the School or recent graduates. Lisa Schnaidt is the sister of Third Level student Laura Schnaidt, James Nativi is the brother of recent graduate, Dr. Paul Nativi, Bernard Ku is the brother of Dr. Irene Ku of the Class of 1978, Michael Favero and Paul Bozoian of the incoming class are the brothers of Paul Favero and Steve Bozoian of the second Level class. Ronald Parkin is the brother of Dr. Ralph Parkin, also of the Class of 1978. Another member of the class, Robert Lowe, has done some research in Microbiology at our School while a WU undergraduate.

Orientation activities began with an introductory meeting of the new class. The rest of the morning was devoted to registration, picture taking, and tours.

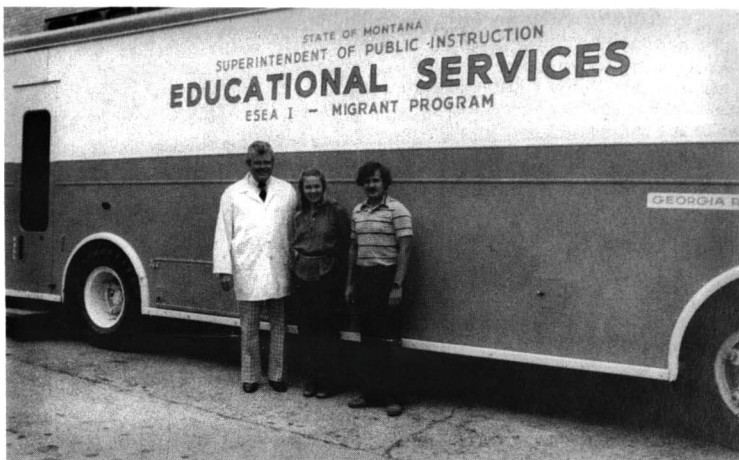

The next day the new students were welcomed by Dean Selfridge and heard talks by a number of School faculty members and staff members on various aspects of the School. Instructors of first term courses for the First Level were on hand to briefly describe their courses and what will be

Orientation Continued

expected of the students. Student representatives of ASDA and the Inter-Fraternity Council also took part in the meeting. Then the new class went to Olin Hall for a luncheon with their faculty advisers. Spouses of the new students, meanwhile, had been invited to lunch with spouses of upperclass students.

That afternoon the First Level students reported to the Health Service for physical exams while their spouses returned to the School for a brief orientation meeting and tours. Orientation visits to the Library and LRC also were on the docket for the new students after their physicals. That evening, the Second Level class and the student wives' organization held a reception for the new class at Olin Hall.

The last activity was a Personal Awareness Inventory testing of the new class conducted by Mrs. Natalie Simmons. After that, the new students enjoyed the holiday weekend as they prepared for the start of classes on Tuesday, September 5.

Dr. Shirley Pierce (center), Chairperson of the School's Department of Community and Preventive Dentistry, is shown with Dean George D. Selfridge (left) and Dr. David Felt '78 in front of a mobile unit that will be used to provide dental services to the children of migrant farm workers in Southeast Missouri as a project of Dr. Pierce's department. The unit is on loan from the State of Montana. Dr. Felt has joined the staff of the department as a clinical assistant and will help man the mobile unit. The four-month pilot program is being funded by the migrant worker center at Southeast Missouri University.
