A Secret Space: MakerSpace at Home

Use natural materials to create something that can hold treasure or secrets, something that only you can see.

1.) Think about what you treasure.
   ○ What do you hold dear?
   ○ What needs a secret spot to hide?

2.) Gather materials to get ready to build.
   ○ Gather materials (sticks, leaves, pine cones, stones).
   ○ Touch, feel, hold each one. This is called tinkering.
   ○ What materials appeal to you and your senses? Which materials have useful shapes, sizes, textures, or weights for your creation?

3.) Begin building your treasure box with your materials.
   ○ Does your creation have any features to help it hide in plain sight? In nature, we call this camouflage.
