

MASTER OF SCIENCE IN HEALTH CARE TRANSFORMATION

Learn how to lead change and create high-value services in the health sector with the renowned faculty at the University of Texas at Austin. The Master of Science in Health Care Transformation provides a unique learning experience where you will innovate, test frameworks, apply concepts to your work environment, and share results with your cohort and the faculty. This one-year program is designed to be completed while working full-time, blending the best of residential and online learning.

A Dynamic Curriculum

The program's interdisciplinary curriculum combines the best thinking and approaches in analytics, design, business, leadership, and other areas to equip students with the knowledge, skills, and hands-on experiences they need to create and lead value-based health care transformation.

Program Highlights:

- ▶ One-year program
- ▶ Designed to be completed while working full-time
- ▶ Provides practical strategies and solutions
- ▶ Combines online and onsite learning
- ▶ Fosters lasting relationships with like-minded colleagues
- ▶ Provides the opportunity to Design and implement a real-world project

In the Master of Science in Health Care Transformation, you will:

- Build a toolkit of practical strategies and solutions
- Join a community of global transformation leaders
- Design and implement a real-world project
- Conceptualize solutions that you can apply immediately
- Be immersed in a unique curriculum that is relevant to the current health care landscape
- Learn how to increase value by dramatically improving outcomes relative to care costs

Admissions

A completed application consists of the following:

- ✓ All sections within online application filled to entirety
- ✓ Official transcripts
- ✓ GRE or GMAT scores *
- ✓ Resume
- ✓ TOEFL or IELTS score for all international applicants
- ✓ Personal essays
- ✓ Two letters of recommendation

Candidates who complete applications by the deadline will be contacted for an interview. Applicants can increase their scholarship chances by applying early.

* Waivers for professional experience and advanced degrees available upon request.

The deadlines for guaranteed consideration are:

- December 15
- February 1 (last deadline for international students)
- April 1

“This program is right on time. It has great relevance to decisions I’m making every day, and my thinking about those decisions has already evolved based on what I’m learning. I have never had this level of applicability or immediate translation in an academic program.”

Rhonda Mundhenk, JD, MPH,
Chief Executive Officer at Clinical Health Network for Transformation (CHN)
