

## **Consent Form - Oral Cancer Screening**

Our office strives to bring its patients state-of-the-art technology to provide you with the latest advancements in oral health. We have recently introduced the  $OralID^{TM}$  screening device into our office. The  $OralID^{TM}$  examination will allow us to visualize any oral mucosal abnormalities including cancer and dysplasia (pre-cancer) before they can be detected with the naked eye. The procedure is quick, painless and no rinses or dyes are used.

Similar to other cancers, early detection of Oral Cancer is critical. Studies have shown that early detection of oral cancer with technologies like the  $OralID^{TM}$  dramatically improves the survivability of the disease. If oral cancer is detected in its later stages, which typically occurs during a conventional oral cancer exam, the chances of survival are dramatically reduced.

## Who is at Risk?

- Age 17+ years
- Tobacco Use
- Alcohol Use
- HPV infection

If you have any questions about risk factors, please feel free to talk to our hygiene staff. We recommend all of our patients be screened with the  $OralID^{m}$  to reduce the mortality of late stage detection.

Our office charges \$ 55.00 per screening with the OralID. We will attempt to bill your insurance, but you will be responsible for any unpaid amount or denial by your insurance company.
