Interior/Exterior Applications

The Slicker exit signs feature stainless steel construction with optional wet location features.

Slicker
Stainless Steel Exit Signs

Description
The Slicker exit signs are designed primarily for interior or exterior locations where corrosion resistance is critical. The finish may also be appropriate where the natural look of satin finished stainless steel is desired. The construction is designed so the sign will remain attractive and functional with minimal maintenance requirements.

Features
The exposed construction is satin finished stainless steel. Weatherproof construction for exterior applications is optional. There is a choice of red and green LEDs with emergency operation as an option.

Applications
Slicker exit signs are appropriate in schools, sports facilities, parking structures, detention facilities, and other areas where exposure and long life are required.

Custom
If your project demands a special fixture we would be pleased to discuss the production of custom fixtures to suit your specific conditions. For more information on our custom capabilities, please contact your local Cole representative.

Options

Directional arrows:

- AL: Arrow left
- AR: Arrow right
- A2: Doublehead
- A: Left and right (for double face)

Tamperproof screws: Socket head faceplate screws. Add suffix -TP.

Emergency battery operation: Integral circuitry provides 90 minutes of operation. Add suffix -EM.

Pendant mount: Provides canopy and 18” stem. Use ceiling model number and add suffix -S1.

Pedestal mount: (Add to ceiling mount only). Provides threaded flange on bottom for 1¼” pipe. Add suffix -PED.

Weatherproof: Add suffix -W.

How to Specify

1. Select catalog number with desired features.
2. Add suffixes for options required to meet job conditions.
