Meet the Myhre Syndrome Clinic Team

All patients of all ages are seen by the core specialists of medical genetics and genetic counseling, cardiology, pulmonary medicine and physical therapy. We generally also recommend cardiovascular imaging and lung testing. Depending on a patient’s needs, we may recommend consultation with other specialists.

Please call 617-726-1561 and speak with Dr. Lin to begin the process of scheduling an appointment or referring a patient. Visit www.massgeneralforchildren.org/myhre to learn more.
