World Archaeology Scavenger Hunt

1. Part of this site includes large stone pillars that predates Stonehenge by 6,000 years!

2. This site is an area known to be a royal cemetery for Pharaohs, including Tutankhamun.

3. This site is made up of 800 rooms and 32 kivas built in the shape of a D.

4. This site, with astronomical significance, may be in the shape of a Pyramid but it’s not located in Egypt.

5. This site is a city frozen in time by a volcanic eruption in 79AD.

6. This 40,000 year old site contains the world’s largest collection of rock art and is still highly important to local Aboriginal people today.

7. The 1.7 million year old stone tools found at this site are some of the earliest tools used by Homo erectus.

8. This site contains some of the world’s oldest cave paintings including hand prints, stick figures and different animals.
Find The Missing Pottery Sherds
Try cutting out the different pot sherds and see if you can find which mug they belong to.

Archaeologists usually find pottery in broken pieces, called sherds. Sometimes the sherds from different pots are all mixed together.

Can you find the missing sherds for these Mesa Verde Black-on-White mugs? They were made by the Ancestral Puebloan people from the Four Corners area of the US about 1180-1300 AD.

Cookie Excavation Mapping Sheet
Before you start to excavate your cookie, make sure to map the chips that you can see on the surface!

How many chocolate chips did you find in your cookie site?
