**BELRAG Awards – What Clubs Should Consider**

It would be helpful for clubs to consider the following:

- The project should have been initiated in the past 2 years.
- A project can only be submitted once to receive an award unless substantial changes have been made to an existing project or it is used for a changing purpose. Please remember to update the changes made.
- The project must be focused on basic education and literacy and have a direct impact on the learning benefits to students.
- Bricks and mortar projects do not have a basic education component. Construction projects should combine with other RAGs such as water and sanitation, for funding grants.
- Show evidence of the impact of the project, including baseline data or observations and final data comparison.

When submitting your application, be sure to include:

- Rotary Club Name and District
- Name and contact information for Rotarian submitting the project (must be a current member of BELRAG)
- Name and contact information for Club President
