PROVIDING THE RIGHT INSIGHTS FOR THE RIGHT OUTCOMES
MyAdvisor/VetAdvisor care coordination program provides expert care for those that serve others. From behavioral health to career development, MyAdvisor will triage individual needs to find the best resources for ongoing support. Client-centric, evidence-based, private, and secure guarantees that any client can connect to the resources needed, at any time.

**THE MYADVISOR/VETADVISOR DIFFERENCE**

With over 12 years of proven success, MyAdvisor provides support to those who are responsible for the safety and welfare of others. Three Wire delivers proactive, preventative, and integrated care coordination to private and public sector employers. This care coordination, in turn, supports clinical tele-behavioral health, holistic wellness, navigational advocacy and family stability, and thus helps individuals thrive in their career and family life.

**WE MAKE DOING BUSINESS EASY**

The contract vehicle you need to get the job done
TECHNOLOGY SOLUTIONS

Advisor Outcomes Platform (AOP)
Proactive, client-centric, evidence-based, private and secure. The AOP not only provides continuity across our communications platform but also guarantees that any available care representative can work with any individual, any time. Our AOP integrates statistics and biometric feedback, individual inputs, and data from real-time care coordination sessions, allowing us to produce proprietary evidence-based workflows.

CLINICAL ASSESSMENT

Our Method
We use the power of technology to access certified care coordinators, licensed clinical social workers, social workers, nutritionists, fitness professionals, psychiatrists, psychologists, nurses, and other medical mental health professionals to facilitate clinical assessments and recommendations.

Navigational Advocacy
Identification and coordination to provide a warm hand-off to both internal and external retired uniformed service personnel support resources (e.g., EAP, behavioral health, VA, community-based projects, VA benefits).

Triage and Crisis Assessment
Our American Association of Suicidology (AAS) accredited contact center care coordinators are trained to identify when an individual needs immediate care, take the appropriate steps to triage the situation, and find the best resources for ongoing support.

CARE COORDINATION SOLUTIONS

Behavioral Health & Wellness
Both clinical tele-behavioral health services and non-clinical supportive services related to wellness such as sleep management, improving levels of fitness, body weight management, medication adherence and smoking cessation.

Career Guidance
Career guidance in areas such as service member skills translation, defining differences between military and corporate structures and improving employee performance within the workplace.

Financial Guidance
Navigational and supportive services in recognizing debt management, awareness of predatory lending practices, budgeting and support in addressing insurance issues (Tricare, SGLI), and both Montgomery and Post 9/11 GI bill procedures.

Life Adjustment
Non-clinical advocacy, support, and education in areas to include improving coping skills, stress management, healthy relationships, effective communication and emotional and self-management.
