Founded in 2006, Three Wire is the leader in innovative and efficient technology solutions for government agencies and large enterprise corporations. Our approach to projects is grounded in solid program management and process improvement principles. With those principles in mind, we design solutions to support your business goals that deliver superior results in a cost-efficient manner. We believe in maximizing investments American taxpayers have already made in the government and military, while modernizing and securing America’s most important information, infrastructure, and assets. Trusted by the Army, Air Force, Marines, USDA, Veteran Affairs and other leading agencies.

Technology Solutions
Technology continues to change at an ever increasing speed. Today, government agencies need the signal in the noise, a trusted guide to help them navigate emerging solutions and make the right choice. Three Wire is the first choice of America’s largest government agencies and provides technology solutions across Cybersecurity, IT Modernization, and Life Cycle Management.

Cybersecurity
We provide cutting edge protection against emerging internal and external threats by creating innovative cyber solutions that mitigate risk both defensively and offensively.

- Modern Security Architectures
